Auditor's Report on Compliance with the Global Investment Performance Standards on a firm-wide basis

To: The Directors of Caisse de dépôt et placement du Québec

We have audited Caisse de dépôt et placement du Québec – Depositors' accounts (the "Company") compliance with the composite construction requirements for the Global Investment Performance Standards ("GIPS") on a firm-wide basis for the year ended December 31, 2013, and the design of its processes and procedures to calculate and present performance results in compliance with the GIPS Standards as of December 31, 2013. Compliance with the GIPS Standards is the responsibility of the management of the Company. Our responsibility is to express an opinion based upon our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the Company complied with the criteria established by the GIPS Standards. Such an audit includes examining, on a test basis, evidence supporting compliance, evaluating the overall compliance with these criteria, and where applicable, assessing the accounting principles used and significant estimates made by management.

In our opinion, the Company has complied with the GIPS Standards for the year ended December 31, 2013, including the composite construction requirements on a firm wide basis and the design of its processes and procedures to calculate and present performance results in compliance with the GIPS Standards as of December 31, 2013.

We have issued a separate audit report on certain individual composite presentations of the Company dated February 25, 2014, and accordingly, we express no opinion or any other form of assurance on any such performance results in this compliance report.

Deloitte LLP¹

General Notes

1. Presentation of the firm

La Caisse de dépôt et placement du Québec ("La Caisse") is a financial institution that manages funds for Quebec's public- and parapublic-sector pension and insurance plans ("the depositors"). La Caisse invests in large liquid markets, private equity and real estate. Depositors' assets in funds, excluding overnight deposits and term deposits, totalled \$199.7 billion as at December 31, 2013. This document presents the returns related to the funds managed by La Caisse for the depositors (see Note 7, p.3).

2. Compliance statement

La Caisse claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. La Caisse has been independently verified for the periods from January 1, 2004 through December 31, 2013.

Verification assesses whether (1) La Caisse has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The composites have been examined for the periods from January 1, 2004 to December 31, 2013.

3. Performance calculations

Performance calculations are based on monthly calculations using the modified Dietz formula. All deposits or withdrawals are performed on the first day of each month. As a result, the calculated returns are in no way distorted by the cash flows which occur during the month.

Each discretionary portfolio for which La Caisse charges operating expenses is included in at least one composite. These composites are valued according to transaction date and their returns are calculated monthly. The quarterly and annual returns are then calculated using the geometric linking method.

Total returns, including realized and unrealized gains and losses plus investment income, are used to calculate returns. These returns include any income generated on cash and cash equivalents. Interest income is accrued and is included in the market value used to calculate returns. Dividend income is generally accrued as of its ex-dividend date.

The fair value of fixed-income securities is determined using the closing prices of such securities at major brokers as well as closing prices provided by recognized financial institutions, depending on their availability. When these values are not available, the fair value is determined by commonly used valuation methods used in capital markets, such as discounting future cash flows at the current interest rate or on the basis of similar arm's-length transactions. These valuations are reviewed biannually by independent external firms. For more information on the valuation methodology used for ABTN (asset-backed term notes), see Note 3e of the combined financial statements.

The fair value of shares traded on a stock exchange is determined based on the closing prices on the major stock exchanges as well as those provided by recognized financial institutions.

In 2007, La Caisse adopted Section 3855 "Financial Instruments — Recognition and Measurement" of part V of the CPA Canada Handbook - Accounting, pre-changeover Canadian GAAP. Under these provisions, establishment of market value must be done using the bid price for assets and the ask price for liabilities. In the goal of preserving direct comparability of the returns with their benchmark indexes, La Caisse continues to use the closing prices to calculate returns.

Valuations of unlisted shares are made according to fair value, that are commonly used valuation methods or on the basis of similar arm's-length transactions. Valuations of shares and convertible securities that are not publicly traded are reviewed biannually by a valuation committee made up of independent experts or by independent external firms.

For mortgage loans and securities for which a market value is not available, the fair value is determined by discounting the cash flows using the rate of return on a similar instrument, with the same maturity and characteristics. Cash flows are divided amongst risk categories which are determined, in the case of loans, by the loan-to-value ratio (LTV), and then assigned the appropriate discount rate.

For real estate holdings, valuations are conducted twice a year by independent valuers. The fair market value derived from the enterprise valuation is established using a widely used valuation method, the publicly traded companies multiples method. This method relies on observable and non-observable inputs, like available market multiples. The fair market value is reviewed on an annual basis by an independent external firm.

Monthly and quarterly returns for the Private Equity, Infrastructure and Real Estate composites are not shown because the composites are entirely valued semi-annually.

The proportion of the Private Equity, Infrastructure and Real Estate composites held by the depositors does not fluctuate between valuation periods.

Derivative instruments are valued using fair value. These values are determined on the basis of closing prices on the major stock exchanges as well as those provided by recognized financial institutions. In the case of unlisted derivative products, certain valuations are made on the basis of similar arm's-length transactions or according to recognized, commonly used models. These valuations are reviewed biannually by independent external firms.

U.S. composite and equity benchmark indexes are presented before non-resident taxes. For other foreign countries, returns are calculated on an after-tax basis. This is due to the fact that La Caisse, acting on behalf of its depositors, benefits from a tax-exempt status on all revenues and interest generated in the United States as a result of the non-taxable status of its clients under existing rules and of the Canada-US fiscal treaty. For all foreign countries, La Caisse can benefit from a tax exemption or a reduced rate of taxation with respect to revenues and/or interest, whether it is due to existing rules or a fiscal treaty between Canada and the foreign country.

4. Risk measure

The dispersion for the Balanced Fund is measured by the standard deviation of annual returns for each of the depositors accounts that are present in the composite throughout the entire year.

For the other composites, this dispersion measure is not used because there are fewer than five portfolios in each of those composites. The dispersion of returns is measured by the annualized standard deviation of monthly returns, for the composite and its benchmark index, over a rolling three-year period.

This information is not used for the Private Equity, Infrastructure and Real Estate composites because they are entirely valued semi-annually.

5. Operating expenses and other fees

Due to the nature of La Caisse's structure, operating expenses and other fees that are charged to the composites are the actual expenses incurred to manage these funds. Total fees are allocated according to cost drivers specific to the different investment activities. All returns in this presentation are calculated before operating expenses and other fees, but net of transaction fees, real estate subsidiaries fees, as well as incurred management fees in investment funds. The actual incurred fees for each composite are presented in basis points.

6. Currency used for reporting

All returns and assets are presented in Canadian dollars.

7. Net assets under management

The net assets under management presented are those of the combined financial statements, adjusted to exclude assets that are not covered by the firm, as described in Note 1, namely overnight deposits and term deposits of depositors.

8. Additional information

The internal procedures manual concerning portfolio valuation, performance calculation and preparation of this presentation of returns is available for existing and potential depositors upon request at servicesadministratifsdepositants@lacaisse.com.

Bonds

Notes to the Bond composite:

1. Composite description

The composite objective is to obtain a return above its benchmark index while investing mainly in Canadian debt securities.

On July 1, 2010, private debt activities were transferred from the Investments and Infrastructures composite to this composite. Until June 30, 2010, the composite included only publicly-quoted bonds.

This composite includes derivative financial instruments in the normal course of investment management. Derivatives are mainly used to hedge positions, reduce market risk and take advantage of arbitrage opportunities.

Securites lending and borrowing activities as well as shorting activities are permitted in the composite within authorized limits. The structure of non-synthetic asset-backed securities should not contain any leverage component.

An immaterial portion of the composite assets has been allocated to external managers.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since July 1, 2010, the benchmark index has been the Dex Universe Bond Index (Adjusted). The DEX provincial bond and DEX municipal bond composites have been replaced with the DEX Québec Bond composite. Prior to this date, the benchmark for this composite was the DEX Universe Bond Index. The change in the benchmark was done to better reflect the overweighting of Québec bonds in the composite.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 10 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 12 basis points.

Real Estate Debt

Notes to the Real Estate Debt composite:

1. Composite description

This composite consists mainly of loan activities and commercial mortgage securities managed by the real estate subsidiary, Otéra Capital. It includes first ranking and lower ranked mortgages, mortgage bonds, bridge loans (mainly variable-rate construction loans), Canadian commercial mortgage-backed securities (CMBS) and collateralized debt obligations (CDO).

The composite includes derivative instruments to manage interest rate and currency risks. Interest rate derivatives are used to bring the duration of the portfolio, and therefore its sensitivity to changes in interest rates, close to the duration of the index and may be used to guarantee rates to borrowers.

This composite should not contain any leverage component, with the exception of leverage resulting from securitization and repossessions where a mortgage loan on a repossessed property already exists, following any operational consolidation as well as amounts owed to minority shareholders. However, a leverage component is tolerated only if it is a result of the effects of duration management or currency hedging activities.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since January 1, 2012, the benchmark index for this composite has been the DEX Universe Bond Index.

From January 1, 2010, to December 31, 2011, the benchmark index for this composite consisted of 90% DEX Universe Bond Index and 10% Giliberto-Levy Index (Hedged).

From October 1, 2005, to December 31, 2009, the benchmark index consisted of 90% DEX Universe Bond Index (formerly known as the Scotia Capital Universe Bond Index) and 10% Barclays CMBS B Index (Hedged). Before November 2008, the Barclays CMBS B index (Hedged) was known as the Lehman Brothers CMBS B (Hedged) index.

From January 1, 1999, to September 30, 2005, the benchmark index for this composite was the Scotia Capital Universe Bond Index.

These changes were justified to better reflect the composition of the composite.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees and subsidiary's fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 5 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 9 basis points.

Short Term Investments

Notes to the Short Term Investments composite:

1. Composite description

The composite objective is to preserve invested capital and maintain a high degree of liquidity while obtaining an income return comparable to that of the 91-Day Canadian T-Bill Index.

This composite includes derivative financial instruments in the normal course of its investment management. Derivatives are used to manage interest rate risk or debt duration.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

The benchmark index for this composite is the DEX 91-Day T-Bill Index.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 2 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 2 basis points.

Long Term Bonds

Notes to the Long Term Bond composite:

1. Composite description

This composite consists essentially of Canadian bonds with long-term maturities. Since January 1, 2010, the composite's objective is to replicate the benchmark return.

2. Composite creation date

The composite was created on April 1, 2005.

3. Benchmark index

Since January 1, 2012, the benchmark index named DEX Long Term Government Bond Index (Adjusted) consists of 10% DEX Long Term Federal Bonds, 40% DEX Long Term Provincial Bonds and 50% DEX Long Term Québec Bonds. These changes were made in order to better reflect the makeup of the composite.

From January 1, 2011, to December 31, 2011, the benchmark index was the DEX Long Term Government Bond Index (Adjusted), which was a combination of 25% DEX Long Term Federal Bonds, 25% DEX Long Term Provincial Bonds and 50% DEX Long Term Québec Bonds. These changes were made in order to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2010, the benchmark index for this composite was the DEX Long Term Government Bond Index (Adjusted) where the Provinces portion was replaced by Québec bonds. This change of index has been made to better reflect the overweighting of Québec bonds in the composite.

From September 1, 2005, to June 30, 2010, the benchmark index for this composite was the DEX Long Term Government Bond Index.

While the composite was being implemented in April 2005, the benchmark was a combination of 50% Scotia Capital Long Term Government Bond Index and 50% Scotia Capital Long Term Federal Bond Index. The proportion was adjusted monthly by 10%, from May 2005 to August 2005, until it was fully replaced with the Scotia Capital Long Term Government Bond Index in September 2005.

4. Calculation period

The composite return is calculated from April 1, 2005, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 6 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 6 basis points.

Notes to the Real Estate composite:

1. Composite description

This composite consists of La Caisse's investments in the real estate subsidiary, Ivanhoé Cambridge. More than 85% of the composite is comprised of direct holdings. The remaining investments held by the real estate subsidiary include investment trusts, mortgages, equities and convertible securities, which are primarily related to real estate assets.

All current income generated by the real estate subsidiary are reinvested in the Real Estate composite. Leasing costs and other leasehold improvements are depreciated over the term of the lease. The returns also include the return on cash and cash equivalents.

The composite, through its real estate subsidiary, may include derivative instruments in the normal course of investment management. Derivatives are used to hedge against currency risk, to manage interest rate risk and manage the duration of the debt.

For direct holdings, the maximum leverage is limited to 55%. No leverage is permitted for indirect holdings. Securities lending and borrowing activities, as well as shorting, are permitted in the composite within authorized limits.

At each valuation date, investments held through external investment funds are valued internally by the real estate subsidiary. This valuation is subsequently compared to the fair market value provided by the general partner or administrator. These funds represent 6% of the Real Estate composite assets.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since January 1, 2010, the benchmark index has been named Aon Hewitt-Real Estate Index (Adjusted) and consists of 40% IPD Canada Index, 30% NCREIF Index (Hedged), 15% IPD UK Index (Hedged), 15% IPD France Index (Hedged), less financing costs, management fees and taxes. Since July 1, 2012, a DEX 30-day T-Bill component was also added to the calculation of the benchmark. This component represents 3% of the benchmark index. The leverage cost consists of a 50% hedged internal debt cost, a 25% 3-year hedged US bond rate plus a 2-3 year mortgage spread Giliberto-Levy, and a 25% 3-year Canadian bond rate plus a Canadian credit spread.

Until December 31, 2009, the benchmark was named Aon-Real Estate Index and consisted of 70% IPD Canadian Property Index and 30% NCREIF Index (Hedged), minus a proportion of the DEX Short Term Corporate Index to reflect the leverage.

The changes made to the index were justified to better reflect the composition of the composite.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees and subsidiary's fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 5 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 10 basis points.

6. Investment valuation

As mentioned in the "Composite description" section, this composite consists of La Caisse's investments in the real estate subsidiary. More than 85% of this composite consists of direct holdings. The remaining investments held by the real estate subsidiary include investment trusts, mortgages, equities and convertible securities, which are primarily related to real estate assets.

Since fundamental factors affecting fair value do not vary significantly over short periods, real estate holdings are appraised each semester since June 2007 and annually prior to that date. These appraisals are performed by recognized and independent chartered business appraisers. To establish a value as at June 30, the appraisers update the capitalization rates and certify the new value. An appraisal is performed at December 31 of each year.

However, each quarter, upon the sale of assets, a gain or loss on the assets is determined. Moreover, it may be the case that a new valuation is mandated between semesters if there is a request for financing or for taxation purposes where a fair value needs to be established. If this valuation results in a significant change in fair market value, it will be recorded during the quarter.

The fair value of non real-estate securities (investment trusts, mortgages, equities and convertible securities, derivatives instruments) is established according to appropriate valuation methods.

In October 2012, the International Accounting Standards Board published a document entitled Investment entities (IFRS 10 Consolidated Financial Statements, IFRS 12 Disclosure of Interests in Other Entities and IAS 27 Consolidated and Separate Financial Statements) requiring a company considered an investment entity to evaluate each of its controlling entities at its fair market value. For the Real Estate composite, the provisions in the Investment Entities document have been adopted since January 1, 2012.

According to IFRS, the fair market value of the non-consolidated subsidiaries held by minority shareholders is established using an enterprise valuation method. The fair market value derived from the enterprise valuation is established using a widely used valuation method, the publicly traded companies multiples method. This method relies on observable and non-observable inputs, like available market multiples. The fair market value is reviewed on an annual basis by an independent external firm.

The change in accounting policy had a positive impact of 4.0% on the composite return for 2012 and 0.3% for 2013.

7. Other returns presented

In addition to the overall return, the annual returns are presented based on capital appreciation or depreciation, and current operating income. Prior to January 1, 2011, these returns were calculated to ensure that the composite's total return equalled the geometric sum of both components.

Infrastructure

Notes to the Infrastructure composite:

1. Composite description

This composite consists primarily of equity investments intent on maintaining and developing companies involved in the infrastructure sectors. These investments take the form of a direct interest in a private or public company and which undertake the development of assets involved in utilities. These investments can be carried out in companies that are in the development or mature stage of the business cycle.

The composite includes derivative financial instruments in the normal course of its management. Derivatives are used to hedge interest rate and currency risk.

A portion of the composite assets is allocated to investment funds.

At each valuation date, the fair value of the investment funds is given by the general partner. This valuation is then compared to the audited financial statements given by the general partner. These funds represent 3% of the composite assets.

2. Composite creation date

The composite was created on July 1, 2010.

3. Benchmark index

Since January 1, 2013, the Infrastructure benchmark index is comprised of a basket of 60 publicly traded hedged infrastructure stocks, with the exception of stocks from emerging countries, which remain unhedged. These changes were made in order to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2012, the benchmark index was comprised of a basket of publicly traded infrastructure stocks provided by Standard & Poor's (Hedged).

Over a short time frame, it is possible to observe significant differences between the return of the composite and its index. The index is comprised of publicly traded securities, while the composite is mainly invested in privately issued securities. The difference in return represents a market variation.

4. Calculation period

The composite return is calculated from July 1, 2010, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees and investment fund management fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 47 basis points. Since the inception of the composite (July 1, 2010), to December 31, 2012, the fees averaged 49 basis points.

Real Return Bonds

Notes to the Real Return Bond composite:

1. Composite description

This composite consists of La Caisse's investments in Canadian real return bonds. The face value of real return bonds is directly linked to the Consumer Price Index. Since January 1, 2010, the composite objective is to replicate the return on its benchmark index.

2. Composite creation date

The composite was created on October 1, 2004.

3. Benchmark index

The benchmark index for this composite is the DEX Real Return Bond Index.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 5 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 10 basis points.

Canadian Equity

Notes to the Canadian Equity composite:

1. Composite description

The Canadian Equity composite objective is to obtain a return above its benchmark index. Its goal is to grow its capital base using a long-term approach. The assets under management are invested based on two strategies: a fundamental approach and an absolute-return strategy.

Foreign investments in this composite may not exceed the imposed 5% foreign content limit.

A non-material portion of the composite assets is allocated to external managers.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since March 1, 2011, the benchmark index has consisted of 90% S&P/TSX Capped Composite Index and 10% Morningstar Québec National Bank Index. The change to the benchmark index was to better reflect the makeup of the composite, which contains a strategy based on which companies are headquartered in Québec.

Prior to this date, the benchmark index was the S&P/TSX Capped Composite Index.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 22 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 27 basis points.

Global Quality Equity

Notes to the Global Quality Equity composite:

1. Composite description

The Global Quality Equity composite objective consists of offering value added above the benchmark index while surpassing the absolute return target of 6%. This strategy does not consider the evolution or the composition of market indices. Instead, the objective is to build a portfolio of companies with proven business models, allowing for strong fundamentals in the long term.

A portion of the composite assets is allocated to external managers.

The standard deviation of this composite is not presented due to the absence of 36 months of historical returns.

2. Composite creation date

The composite was created on January 1, 2013.

3. Benchmark index

The benchmark index for this composite consists of 85% MSCI ACWI (Unhedged) and 15% DEX 91-day Treasury Bill Index.

4. Calculation period

The composite return is calculated from January 1, 2013, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

Since the inception of the composite (January 1, 2013), the fees averaged 35 basis points.

Global Equity

Notes to the Global Equity composite:

1. Composite description

The Global Equity composite objective consists of offering value added above the benchmark index. The assets under management of the composite are invested using the following investment strategies: long/short strategies, external managers, absolute-return strategies, Chinese investments and indexed management.

Securites lending and borrowing activities are permitted in the composite within authorized limits.

A portion of the composite assets is allocated to external managers.

2. Composite creation date

The composite was created on April 1, 2010.

3. Benchmark index

The benchmark index for this composite is the MSCI ACWI (Unhedged).

4. Calculation period

The composite return is calculated from April 1, 2010, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 74 basis points. Since the inception of the composite (April 1, 2010), to December 31, 2012, the fees averaged 44 basis points.

Emerging Markets Equity

Notes to the Emerging Markets Equity composite:

1. Composite description

Since July 1, 2013, the composite objective consists of offering value added above the benchmark index by adopting a hybrid approach (indexed with an active management overlay). The indexed portion of assets under management of the composite are invested and managed internally. The active management portion mainly consists of external management activities.

From April 1, 2010, to June 30, 2013, the composite objective had been to replicate the MSCI EM Index return.

A portion of the composite assets is allocated to external managers except for the period between April 1, 2010 and June 30, 2013.

Securities lending and borrowing activities as well as shorting are permitted in the composite within authorized limits.

2. Composite creation date

The composite was created on October 1, 2002.

3. Benchmark index

Since July 1, 2013, the benchmark index for this composite is composed of MSCI EM (Unhedged) and MSCI China A. The weight associated with the China A component is proportional to the authorized investments by La Caisse in the China A index. The change to the benchmark index was to better reflect the makeup of the composite which now contains China A activities.

Before June 30, 2013, the benchmark index was the MSCI EM (Unhedged).

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 21 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 32 basis points.

U.S. Equity

Notes to the U.S. Equity composite:

1. Composite description

The composite objective is to replicate the benchmark index return.

2. Composite creation date

The composite was created on April 1, 2010.

3. Benchmark index

The benchmark index for this composite is the S&P 500 (Unhedged).

4. Calculation period

The composite return is calculated from April 1, 2010, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 8 basis points. Since the inception of the composite (April 1, 2010), to December 31, 2012, the fees averaged 9 basis points.

Private Equity

Notes to the Private Equity composite:

1. Composite description

This composite consists of private equity activities that specialize in the following types of investment: leveraged buyouts, growth capital, venture capital, distressed debt, mezzanine debt and restructuring.

Certain assets originating from the Investments and Infrastructures composite were transferred into the composite on July 1, 2010 due to the revised portfolio offering and the closing of the Investments and Infrastructures composite.

The composite includes derivative instruments in the normal course of investment management. Derivatives are used to hedge interest rate and currency risk, or to hedge a position in the portfolio.

At each valuation date, the fair value of the investment funds is given by the general partner. This valuation is then compared to the audited financial statements given by the general partner. These funds represent 42% of the composite assets.

2. Composite creation date

The composite was created on October 1, 2003.

3. Benchmark index

Since January 1, 2013, the benchmark index consists of 50% State Street Private Equity Index Adjusted (Hedged) and 50% MSCI World Index (Hedged). This change in benchmark was justified in order to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2012, the benchmark index consisted of 70% State Street Private Equity Index Adjusted (Hedged) and 30% MSCI World Index (Hedged). Assets transferred into this composite on July 1, 2010 altered the composition of the composite, justifying the new benchmark.

From October 1, 2006, to June 30, 2010, the benchmark index consisted of 60% S&P 500 Index (Hedged) and 40% MSCI EAFE Index (Hedged). Sector and geographic changes in the composite's investment policy, as well as increased liquidity, justified the change in benchmark.

Prior to October 1, 2006, the benchmark index for this composite was the S&P 600 Index adjusted to reflect the investment types within the composite. Only the following sectors were included in the index calculations: consumer staples, consumer discretionary, healthcare, information technology, telecommunications and the industrials. The sector weighting was fixed.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction and investment fund management fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 26 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 26 basis points.

Hedge Funds

Notes to the Hedge Funds composite:

1. Composite description

Since May 1, 2009, the composite is mainly composed of hedge funds and external funds of funds. Previously, the composite included internal activities which consisted of relative value strategies and directional strategies on various markets.

The composite includes derivatives to hedge against currency and interest rate risks. Prior to May 1, 2009, this composite included derivatives in the normal course of investment management.

The name of the composite was changed from Hedge Fund Partnership Units to Hedge Funds on April 1, 2005.

2. Composite creation date

The composite was created on October 1, 2003.

3. Benchmark index

Since July 1, 2007, the benchmark index has been the Credit Suisse Hedge Fund Index Adjusted (Hedged). Prior to 2013, the index was called Dow Jones Credit Suisse Hedge Fund Index Adjusted (Hedged) and prior to 2010, it was called CS/Tremont Hedge Fund Index Adjusted (Hedged). This index is the non-investable "Broad Index" which has been modified so that the weightings of the strategies better reflect the makeup of the composite. This change in benchmark is justified in order to be able to compare the composite strategy to a hedge fund universe.

From July 1, 2006, to June 30, 2007, the benchmark index was the Scotia Capital 91-Day Canadian T-Bill Index. This change in benchmark was justified because as of June 30, 2006, Standard & Poor's stopped publishing the S&P Hedge Fund Index.

From January 1, 2005, to June 30, 2006, the benchmark index was the S&P Hedge Fund Index. This change in benchmark was justified in order to be able to compare the composite strategy to a hedge fund universe.

Prior to January 1, 2005, the benchmark index was the Scotia Capital 91-Day T-Bill Index.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction and investment fund management fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 33 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 38 basis points.

Balanced Fund

Composition of the Balanced Fund Benchmark Index

Benchmark ¹	Benchmark weights (as at December 1, 2013)
DEX Universe (Adjusted)	27%
DEX Universe Bond	6%
DEX 91-Day T-Bill	1%
DEX Long-Term Government Bond (Adjusted)	1%
Aon Hewitt - Real Estate (Adjusted)	11%
Infrastructure	5%
DEX Real Return Bond	1%
Canadian Equity	11%
Global Quality Equity	7%
MSCI ACWI (Unhedged)	2%
Emerging Markets Equity	5%
S&P 500 (Unhedged)	6%
MSCI EAFE (Unhedged)	5%
Private Equity	11%
Credit Suisse Hedge Fund Index Adjusted (Hedged)	2%

1. The index descriptions are presented in each composite note.

Notes to the Balanced Fund composite:

1. Composite description

This composite consists of all depositors' accounts, including the General Fund. It measures La Caisse's overall asset allocation strategy among the various asset classes available to depositors. Treasury and overlay activities are also included in this composite. Since 2007, an unrealized writedown of ABTN securities has been recorded in this composite. Please see Note 3e of the combined financial statements for more details.

The composite may include derivative instruments in the normal course of investment management. Derivatives are used to hedge positions, to reduce market risk, to take advantage of arbitrage opportunities, replicate the benchmark, to rapidly enter or exit a position, hedge currency risk and to match the duration of a composite to that of the benchmark index.

Leverage activities may be present in the composite, including short selling. The extent of the leverage depends on the nature of the investment. Certain strategies have no leverage component while others are fully leveraged within authorized limits.

A portion of the composite assets are allocated to external managers.

In 2012, following the adoption of IFRS for the Real Estate composite, a change was made to the valuation methodology used in the Real Estate composite of the Balanced Fund. Please refer to page 14 of this document for more details. Adoption of IFRS had a positive impact of 0.4% on the 2012 return of the Balanced Fund composite. For 2013, the impact is non-material on the composite return.

2. Composite creation date

The composite was created on October 1, 2002.

3. Benchmark index

The benchmark index for this composite is an index created by La Caisse. It consists of the weighted average of the depositors' benchmarks. These indexes correspond to the weighted average indexes of each investment class as specified in the reference policy of each depositor. The depositors' reference policies are established once a month, based on the depositors' preferences and needs, as well as market forecasts. The benchmark index also contains a certain level of exposure to certain currencies and a duration adjustment as defined in the reference policy for each depositor. The weights of each index that make up this composite benchmark index as at December 1, 2013, are presented in the table in the previous page.

4. Calculation period

The composite return is calculated from January 1, 2004, to December 31, 2013.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees, real estate subsidiaries fees as well as investment fund management fees.

For the 12 months ended December 31, 2013, the operating expenses and other fees for this composite are 19 basis points. In the previous four years (January 1, 2009, to December 31, 2012), the fees averaged 22 basis points.

II. Financial statistics and review

1. Changes in net assets	41
2. Statement of income and changes in net assets under management	42
3. Changes in depositors' holdings	43
4. Breakdown of depositors' holdings	50
5. Annual interest or income paid out on average deposits	51
6. Summary of investments	52
7. Breakdown of investments	53
8. Real Estate – Mortgages of \$5 million and over	55
9. Investments in shares and bonds of publicly traded companies	64
10. Investments in shares and bonds of privately held companies	146
11. Statement of real estate holdings.....	159
12. Statement of properties held for resale.....	161

Participation deposits ²	6.64	5.74	4.00	1.76	1.14	0.65	8.32	7.82	6.75	4.05

¹ The General Fund receives demand and term deposits from depositors and pays out interest on these deposits. The rate indicated is the average rate paid out during the year

² Income earned on the investments of La Caisse's General Fund and Individual Funds is paid out or allocated to participation deposit holders. The rate indicated is the average annual rate. The rate represents only the income accounted for during the year on depositors' investments. It does not account for the changes in the fair value of investments. For purposes of this calculation, participation deposits are computed at cost. The rate is different from the time-weighted rate of return which includes both income and changes in the fair value of investments.

INVESTMENTS IN SHARES AND BONDS OF PUBLICLY TRADED COMPANIES
as at December 31, 2013
(fair value - in millions of dollars)

Notes that are important to understand the table:

This table lists the major investments in corporate shares and bonds as shown in the assets in the combined financial statements. This table is subject to the disclosure standards applicable to the annual list of such investments. In addition to these investments and according to the investment policies of the specialized portfolios, the managers use derivative financial instruments that generate a return on the Caisse's equity securities, without these securities being the property of La Caisse.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Notes that are important to understand the table:

This table lists the major investments in corporate shares and bonds as shown in the assets in the combined financial statements. This table is subject to the disclosure standards applicable to the annual list of such investments. In addition to these investments and according to the investment policies of the specialized portfolios, the managers use derivative financial instruments that generate a return on the Caisse's equity securities, without these securities being the property of La Caisse.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

INVESTMENTS IN SHARES AND BONDS OF PRIVATELY HELD COMPANIES

as at December 31, 2013

(fair value - in millions of dollars)

Value of investments:

A = \$0 to \$5 million	C = \$10 to \$30 million	E = \$50 to \$75 million	G = \$100 to \$150 million	I = \$300 to \$500 million
B = \$5 to \$10 million	D = \$30 to \$50 million	F = \$75 to \$100 million	H = \$150 to \$300 million	J = \$500 million and over

Notes that are important to understand the table:

This table lists the major investments in shares and bonds of private corporations as shown in the assets of the combined financial statements. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Pursuant to agreement, the specific value of investments in any private company (according to the definition provided in the Québec Securities Act) does not appear in this list unless the company has agreed to such disclosure.

Notes that are important to understand the table:

This table lists the major investments in shares and bonds of private corporations as shown in the assets of the combined financial statements. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Pursuant to agreement, the specific value of investments in any private company (according to the definition provided in the Québec Securities Act) does not appear in this list unless the company has agreed to such disclosure.

¹ Investment made or held by La Caisse or a subsidiary created pursuant to section 37.1 of the Act respecting the Caisse.

² Investment made or held by La Caisse or one of its subsidiaries pursuant to the last paragraph of section 37.1 of the Act respecting the Caisse.

³ See Note 3e to the combined financial statements.
