Auditor's Report on Compliance with the Global Investment Performance Standards on a firm-wide basis

To the Directors of Caisse de dépôt et placement du Québec

We have audited Caisse de dépôt et placement du Québec – Depositors' accounts (the "Company") compliance with the composite construction requirements for the Global Investment Performance Standards ("GIPS") on a firm-wide basis for the year ended December 31, 2014, and the design of its processes and procedures to calculate and present performance results in compliance with the GIPS Standards as of December 31, 2014. Compliance with the GIPS Standards is the responsibility of the management of the Company. Our responsibility is to express an opinion based upon our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the Company complied with the criteria established by the GIPS Standards. Such an audit includes examining, on a test basis, evidence supporting compliance, evaluating the overall compliance with these criteria, and where applicable, assessing the accounting principles used and significant estimates made by management.

In our opinion, the Company has complied with the GIPS Standards for the year ended December 31, 2014, including the composite construction requirements on a firm wide basis and the design of its processes and procedures to calculate and present performance results in compliance with the GIPS Standards as of December 31, 2014.

We have issued a separate audit report on certain individual composite presentations of the Company dated February 25, 2015, and accordingly, we express no opinion or any other form of assurance on any such performance results in this compliance report.

General Notes

1. Presentation of the firm

La Caisse de dépôt et placement du Québec (“la Caisse”) is a financial institution that manages funds for Quebec’s public and parapublic pension and insurance plans (the “depositors”). La Caisse invests in large liquid markets, private equity and real estate. The net assets attributable to depositors, excluding demand deposits and term deposits, totalled \$225.4 billion as at December 31, 2014. This document presents the returns related to the funds managed by la Caisse for the depositors (see Note 7, p. 7).

2. Compliance statement

La Caisse claims compliance with the Global Investment Performance Standards (GIPS[®]) and has prepared and presented this report in compliance with the GIPS[®] standards. La Caisse has been independently verified for the periods from January 1, 2004 through December 31, 2014.

Verification assesses whether (1) La Caisse has complied with all the composite construction requirements of the GIPS[®] standards on a firm-wide basis and (2) the firm’s policies and procedures are designed to calculate and present performance in compliance with the GIPS[®] standards. The composites have been examined for the periods from January 1, 2004 to December 31, 2014.

3. Performance calculations

Performance calculations are based on monthly calculations using the modified Dietz formula. All deposits or withdrawals take place on the first day of each month. As a result, cash flows have no effect on performance.

Each discretionary portfolio for which la Caisse charges operating expenses is included in at least one composite. The composites are valued according to transaction date, and their returns are calculated monthly. The geometric linking method is then used to calculate quarterly and annual returns.

Total returns, including realized gains and losses on the sale of investments, unrealized gains and losses, and investment income and expenses, are used to calculate returns. These returns include any income generated on cash and cash equivalents. Interest income is accrued and is included in the market value used to calculate returns. Dividend income is generally accrued as of the ex-dividend date.

In accordance with the decision of the Accounting Standards Board of Canada (AcSB), la Caisse was authorized to adopt International Financial Reporting Standards (IFRS) effective January 1, 2014. La Caisse qualifies as an investment entity under IFRS. In addition, all financial instruments are measured at fair value in accordance with IFRS 13, *Fair Value Measurement*.

IFRS require a company qualifying as an investment entity to no longer consolidate its subsidiaries, but rather to measure them at fair value as an investment. The fair value of these subsidiaries is established using an enterprise value method that reflects, among other things, the fair value of financial instruments held directly by these subsidiaries. Previously, under Canadian Generally Accepted Accounting Principles, the composites included consolidation of the subsidiaries’ assets and liabilities. This change concerns the Real Estate Debt, Real Estate, Infrastructure and Private Equity composites.

All the composites adopted IFRS during the year. Adoption of the new standards as at January 1, 2014 had no impact on the returns presented. However, the Real Estate composite early adopted IFRS on January 1, 2012, and the impact of this adoption on returns is presented in the Investment Valuation section of the Real Estate composite and in the Composite description section of the Balanced Fund composite.

For more details on the valuation methods and policies, guidelines and procedures related to fair value measurement, see Note 7 of the Consolidated Financial Statements.

The fair value of fixed-income securities is determined from the closing prices of such securities at major brokers as well as closing prices provided by recognized financial institutions, depending on their availability. When these values are not available, the fair value is determined by valuation methods commonly used in capital markets, such as discounting of future cash flows at the current interest rate. For more information on the valuation methodology used for asset-backed term notes (ABTNs), see Note 7 of the Consolidated Financial Statements.

The fair value of shares traded on a stock exchange is determined from closing prices on the major stock exchanges.

Valuations of unlisted shares are made according to commonly used valuation methods or on the basis of similar arm's length transactions. Valuations of shares and convertible securities that are not publicly traded are reviewed by la Caisse's Valuation Committee. The fair value of investment funds is determined based on the fair value of the net assets provided by the general partner or the administrator.

For the Private Equity, Infrastructure and Real Estate composites, whose investments are valued on a biannual basis only, returns are not presented for a shorter period.

The proportion of the Private Equity, Infrastructure and Real Estate composites held by the depositors does not fluctuate between valuation periods.

Derivative financial instruments are recorded at their fair value. These values are determined on the basis of closing prices on major stock exchanges. In the case of unlisted derivative financial instruments, certain valuations are obtained by broker quotes provided by recognized financial institutions or based on recognized and commonly used models. These valuations are reviewed biannually by independent external firms.

U.S. equity composites and benchmark indexes are presented before non-resident taxes. For other foreign countries, returns are calculated on an after-tax basis. This is due to the fact that la Caisse, acting on behalf of its depositors, benefits from a tax-exempt status on all revenues and interest generated in the United States as a result of the non-taxable status of its depositors under the provisions of domestic law and of the Canada-United States tax treaty. For some foreign countries, la Caisse may benefit from a tax exemption or a reduced rate of taxation with respect to revenues and interest, under domestic law or a tax treaty between Canada and the foreign country.

Effective July 31, 2014, DEX bond indexes were renamed FTSE TMX Canada. Only the names of the indexes changed.

4. Risk measure

For the Balanced Fund composite, dispersion is measured by the standard deviation of annual returns for each of the depositors' accounts that are present in the composite during the entire year.

For the other composites, this dispersion measure is not used because there are fewer than five portfolios in each of the composites. The dispersion of returns is measured by the annualized standard deviation of monthly returns, for the composite and its benchmark index, over a rolling three-year period.

This information is not presented for the Private Equity, Infrastructure and Real Estate composites because they are entirely valued biannually.

5. Operating expenses and other fees

Given the nature of la Caisse, operating expenses and other fees that are charged to the composites are the actual expenses incurred to manage the funds. Total fees are allocated according to cost drivers specific to the different investment activities. All returns in this presentation are calculated before operating expenses and other fees, but net of transaction fees, real estate subsidiaries fees, as well as incurred external management fees related to investment funds. The actual expenses incurred for each composite are presented in basis points.

6. Currency used for reporting

All returns and assets are presented in Canadian dollars.

7. Net assets under management

Net assets under management correspond to net assets attributable to depositors, presented in the Consolidated Financial Statements, adjusted to exclude assets that are not covered by the firm, as described in Note 1, namely depositors' demand deposits and term deposits.

8. Additional information

The internal procedures manual concerning portfolio valuation, performance calculation and preparation of this presentation of returns is available to existing and potential depositors upon request at servicesadministratifsdepositants@lacaisse.com.

Bonds

Notes to the Bonds composite:

1. Composite description

The composite objective is to outperform its benchmark index while investing mainly in Canadian debt securities.

On July 1, 2010, private debt activities were transferred from the Investments and Infrastructures composite to this composite. Until June 30, 2010, the composite included only publicly traded bonds.

This composite uses derivative financial instruments in the normal course of its management. Derivatives are used mainly to hedge positions, reduce market risk and take advantage of arbitrage opportunities.

Securities lending and borrowing as well as securities sold short are permitted in the management of this composite within authorized limits. The structure of non-synthetic, securitized debt securities backed by tangible assets must not contain any leverage component.

An immaterial portion of the composite's assets has been allocated to external managers.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since July 1, 2010, the benchmark index has been the FTSE TMX Canada Universe Bond Index (Adjusted)*. The FTSE TMX Canada Provincial Bond* and FTSE TMX Canada Municipal Bond* components were replaced by the FTSE TMX Canada Provincial Quebec Bond* component. Before this date, the benchmark for this composite was the FTSE TMX Canada Universe Bond Index*. This change in benchmark was warranted to better reflect the overweighting of Québec bonds in the composite.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 9 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 11 basis points. The impact of adopting this methodology is -1 basis point for the 12 months ended December 31, 2014 and -1 basis point for the previous four years.

Real Estate Debt

Notes to the Real Estate Debt composite:

1. Composite description

This composite consists mainly of loan activities and commercial mortgage securities managed by the subsidiary, Otéra Capital. It includes first-ranking or lower-ranked mortgages, mortgage bonds and bridge loans (mainly construction loans). The composite may hold Canadian commercial mortgage-backed securities (CMBS) underwritten internally.

The composite includes various derivative financial instruments used to manage interest rate and currency risks. Interest rate derivatives are used to bring the portfolio's duration, and therefore its sensitivity to changes in interest rates, close to the duration of the index and may also be used to guarantee rates to borrowers.

No leverage component is authorized in this composite, with the exception of leverage resulting (1) from securitization and repossession where a mortgage loan on a repossessed property already exists, (2) from the consolidation of operational platforms and (3) amounts owed to shareholders. However, a leverage component may be tolerated if it is due to the effects of duration management or currency hedging activities.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since January 1, 2012, the benchmark index for this composite has been the FTSE TMX Canada Universe Bond Index*.

From January 1, 2010, to December 31, 2011, the benchmark index for this composite consisted of 90% FTSE TMX Canada Universe Bond Index* and 10% Giliberto-Levy Index (Hedged).

From October 1, 2005, to December 31, 2009, the benchmark index consisted of 90% FTSE TMX Canada Universe Bond Index* and 10% Barclays CMBS B Index (Hedged).

From January 1, 2005, to September 30, 2005, the benchmark index for this composite was the FTSE TMX Canada Universe Bond Index*.

These index changes were justified to better reflect the makeup of the composite.

*Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and fees, but net of transaction fees and expenses related to the unconsolidated subsidiary. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 4 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 8 basis points. The impact of adopting this methodology is 0 basis point for the 12 months ended December 31, 2014 and -1 basis point for the previous four years.

6. Investment valuation

As described in the General Notes, la Caisse values its interest in Otéra Capital, its unconsolidated subsidiary, at fair value as an investment. The fair value of equity interests in the subsidiary is established using an enterprise value method. This enterprise value reflects the fair value of assets held directly by this subsidiary that includes mainly commercial mortgage loans. This value is established based on the net assets in the subsidiary's audited financial statements. The fair value of interests in the form of debt instruments in this subsidiary is established by discounting future cash flows. This valuation is based primarily on observable input data, such as interest rates and credit spreads related to the subsidiary's credit quality.

The fair value of commercial mortgage loans is established by discounting future cash flows, which are divided into risk categories determined by the loan-to-value ratio and then assigned an appropriate discount rate in line with the market. Valuations of commercial mortgage loans are reviewed semi-annually by an independent external firm.

Short Term Investments

Notes to the Short Term Investments composite:

1. Composite description

The objective of the composite is to preserve invested capital and to maintain a high degree of liquidity while obtaining a current yield comparable to that of the FTSE TMX Canada 91-Day TBill Index.

This composite uses derivative financial instruments in the normal course of its management. Derivatives are used in order to manage interest rate risk or debt duration.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

The benchmark index for this composite is the FTSE TMX Canada 91-Day TBill Index*.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 2 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 2 basis points. The impact of adopting this methodology is 0 basis point for the 12 months ended December 31, 2014 and 0 basis point for the previous four years.

Long Term Bonds

Notes to the Long Term Bonds composite:

1. Composite description

This composite consists essentially of Canadian bonds with long-term maturities. Since January 1, 2010, the composite's objective has been to replicate the return on its benchmark index.

2. Composite creation date

The composite was created on April 1, 2005.

3. Benchmark index

Since January 1, 2012, the benchmark index has been called the FTSE TMX Canada Long Term Government Bond Index (Adjusted)* and it consists of 10% FTSE TMX Canada Long Term Federal Bonds*, 40% FTSE TMX Canada Long Term Provincial Bonds* and 50% FTSE TMX Canada Long Term Québec Bonds*. These changes were made in order to better reflect the makeup of the composite.

From January 1, 2011, to December 31, 2011, the benchmark index was the FTSE TMX Canada Long Term Government Bond Index (Adjusted)*, which was a combination of 25% FTSE TMX Canada Long Term Federal Bonds*, 25% FTSE TMX Canada Long Term Provincial Bonds* and 50% FTSE TMX Canada Long Term Québec Bonds*. These changes were made in order to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2010, the benchmark index for this composite was the FTSE TMX Canada Long Term Government Bond Index (Adjusted)* with the Provinces portion replaced by Québec bonds. This change of index was warranted to better reflect the overweighting of Québec bonds in the composite.

From September 1, 2005, to June 30, 2010, the benchmark index for this composite was the FTSE TMX Canada Long Term Government Bond Index*.

While the composite was being implemented in April 2005, the benchmark was a combination of 50% FTSE TMX Canada Long Term Government Bond Index* and 50% FTSE TMX Canada Long Term Federal Bond Index*. The proportion was adjusted monthly by 10%, from May 2005 to August 2005, until it was fully replaced by the FTSE TMX Canada Long Term Government Bond Index* in September 2005.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from April 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 5 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 6 basis points. The impact of adopting this methodology is -1 basis point for the 12 months ended December 31, 2014 and 0 basis point for the previous four years.

Notes to the Real Estate composite:

1. Composite description

This composite consists of investments held by the real estate subsidiary, Ivanhoé Cambridge. More than 80% of the composite's gross assets are comprised of direct holdings. The remaining investments held by the subsidiary include investment funds, mortgages, equities and convertible securities, which are primarily related to real estate assets.

This composite, through the real estate subsidiary, may include derivative financial instruments in the normal course of its management. Derivatives are used mainly to hedge against currency risk, manage interest rate risk and manage the duration of debt.

For the real estate subsidiary's direct holdings, the maximum leverage is 55%. No leverage is permitted for indirect holdings. Securities lending and borrowing, as well as securities sold short are permitted in the composite within authorized limits.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since January 1, 2010, the benchmark index has been called the Aon Hewitt-Real Estate Index (Adjusted) and it consists of 40% IPD Canada Index, 30% NCREIF Index (Hedged), 15% IPD UK Index (Hedged) and 15% IPD France Index (Hedged), less financing costs, management fees and taxes. Since July 1, 2012, a FTSE TMX Canada 30 Day TBill* component was added to the calculation of the benchmark. This component represents 3% of the benchmark index. The financing costs consist of 50% hedged internal real cost of financing, 25% 3-year hedged U.S. bond rate plus a 2-3 year Giliberto-Levy credit spread and 25% 3-year Canadian bond rate plus a Canadian mortgage credit spread.

Until December 31, 2009, the benchmark was called the Aon-Real Estate Index and consisted of 70% IPD Canadian Property Index and 30% NCREIF Index (Hedged), minus a proportion of the FTSE TMX Canada Short Term Corporate Index* to reflect leverage.

The changes to the index were made to better reflect the makeup of the composite.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net for transaction fees and expenses related to the unconsolidated subsidiary. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 3 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 8 basis points. The impact of adopting this methodology is 0 basis point for the 12 months ended December 31, 2014 and -1 basis point for the previous four years.

6. Investment valuation

As described in the General Notes, the Real Estate composite early adopted IFRS on January 1, 2012. La Caisse values its interest in its unconsolidated real estate subsidiary at fair value as an investment. The fair value of equity interests in the real estate subsidiary is established using a widely used enterprise valuation method: the publicly traded companies multiples method. This method relies on observable and non-observable inputs, such as the price/book value multiple. This enterprise value reflects, among other things, the fair value of assets and liabilities held directly by the subsidiary, including mainly investment properties, as well as the fair value resulting from the quality of the portfolio and integrated management of the subsidiary's platform. The valuation is established annually by an independent external firm.

The change in accounting policy had a positive impact of 4.0% on the composite's return for 2012, 0.3% for 2013 and 1.4% for 2014.

The fair market value of investment properties held directly by the subsidiary is reviewed by external, recognized and independent chartered real estate appraisers. Since fundamental factors affecting fair value do not vary significantly over short periods, the properties held by the real estate subsidiary have been appraised biannually since June 2007 and annually before that date. Valuations are performed in accordance with the valuation standards in effect in each market. To establish the value as at June 30, the appraisers update the discount and capitalization rates and certify the new value. A complete appraisal is performed as at December 31 of each year.

At each valuation date, investments held through external investment funds, unlisted shares and mortgage financing are valued internally by the real estate subsidiary and represent approximately 8% of the composite's assets. In the case of investment funds, which represent more than 7% of the composite's assets, the valuation is subsequently compared with the fair market value provided by the general partners or the administrator.

On a quarterly basis, when properties are sold, gains and losses on dispositions are determined. Moreover, a situation such as a request for financing or establishment of a property's tax value may give rise to a new valuation between evaluation periods. If this valuation results in a significant change in fair market value, it will be recorded during the quarter.

7. Other returns presented

For this composite, in addition to the total return, the annual returns on capital appreciation or depreciation and current operating income of the unconsolidated subsidiary are presented. The current income generated by the real estate subsidiary is reinvested in it. The current income includes lease revenue, return on cash and cash equivalents less real estate operating costs, and financing costs. Since January 1, 2011, these returns have been calculated separately, geometrically linking the returns calculated with the modified Dietz formula. Before January 1, 2011, these returns were calculated to ensure that the composite's total return equaled the geometric sum of both components.

Infrastructure

Notes to the Infrastructure composite:

1. Composite description

This composite primarily manages negotiated equity investments made to maintain or develop companies in the infrastructure sectors. The investments take the form of interests in listed or unlisted companies that operate utility-type assets. Such investments may be made in projects in the development or mature stage of the business cycle.

The composite uses derivative financial instruments in the normal course of its management. Derivatives are used mainly to hedge interest rate and currency risk.

A portion of the composite's assets is allocated to investment funds.

At each valuation date, the fair value of the investment funds is provided by the general partner. This valuation is then compared with the audited financial statements provided by the general partner. These funds represent 2% of the composite's assets.

2. Composite creation date

The composite was created on July 1, 2010.

3. Benchmark index

Since January 1, 2013, the Infrastructure benchmark index has consisted of a basket of 60 publicly traded, hedged infrastructure companies, with the exception of emerging markets companies, which are unhedged. These changes were made in order to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2012, the benchmark index was comprised of a basket of publicly traded, hedged infrastructure companies provided by Standard & Poor's.

Over short periods, significant differences can be observed between the return of the composite and its index. The index is comprised of publicly traded securities, whereas the composite is invested mainly in privately issued securities. The difference in returns is due to market fluctuations.

4. Calculation period

The return on the composite is calculated from July 1, 2010, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees and investment fund management fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 34 basis points. Since the inception of the composite (July 1, 2010), to December 31, 2013, the fees averaged 46 basis points. The impact of adopting this methodology is -4 basis points for the 12 months ended December 31, 2014 and -3 basis points since inception.

Real Return Bonds

Notes to the Real Return Bonds composite:

1. Composite description

This composite consists of la Caisse's investments in Canadian real return bonds. The face value of real return bonds is linked directly to the Consumer Price Index. Since January 1, 2010, the objective of the composite has been to replicate the return on its benchmark index.

2. Composite creation date

The composite was created on October 1, 2004.

3. Benchmark index

The benchmark index for this composite is the FTSE TMX Canada Real Return Bond Index*.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 7 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 9 basis points. The impact of adopting this methodology is -1 basis point for the 12 months ended December 31, 2014 and 0 basis point for the previous four years.

Global Quality Equity

Notes to the Global Quality Equity composite:

1. Composite description

The objective of the Global Quality Equity composite is to generate a risk-adjusted return that outperforms the benchmark index while surpassing the absolute return target of 6%. This strategy does not consider changes to or the composition of market indexes. Instead, the objective is to build a portfolio of companies whose proven business models allow for strong fundamentals over the long term.

A portion of the composite's assets is allocated to external managers.

The standard deviation of this composite is not presented because 36 months of historical returns were not available.

2. Composite creation date

The composite was created on January 1, 2013.

3. Benchmark index

The benchmark index for this composite consists of 85% MSCI ACWI (Unhedged) and 15% FTSE TMX Canada 91 Day TBill Index*.

* Refer to Note 3 of the General Notes of this document for more details.

4. Calculation period

The return on the composite is calculated from January 1, 2013, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 16 basis points. Since the inception of the composite (January 1, 2013), to December 31, 2013, the fees were 24 basis points. The impact of adopting this methodology is -3 basis points for the 12 months ended December 31, 2014 and -10 basis points since inception.

Canadian Equity

Notes to the Canadian Equity composite:

1. Composite description

The objective of the Canadian Equity composite is to outperform its benchmark index. It aims for long-term growth of capital. The capital under management is invested according to two strategies: a fundamental approach and an absolute-return approach.

Foreign investments in this composite may not exceed the imposed 5% foreign content limit.

An immaterial portion of the composite's assets is allocated to external managers.

2. Composite creation date

The composite was created on September 1, 1998.

3. Benchmark index

Since March 1, 2011, the benchmark index has consisted of 90% S&P/TSX Capped Composite Index and 10% Morningstar Québec National Bank Index. The change to the benchmark index was made to better reflect the makeup of the composite, which includes a strategy based on companies headquartered in Québec.

Before this date, the benchmark index was the S&P/TSX Capped Composite Index.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 13 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 23 basis points. The impact of adopting this methodology is -2 basis points for the 12 months ended December 31, 2014 and -1 basis point for the previous four years.

Emerging Markets Equity

Notes to the Emerging Markets Equity composite:

1. Composite description

Since July 1, 2013, the objective of this composite has been to outperform the benchmark index by adopting a hybrid approach (indexed with an active management overlay). The composite's indexed portion of assets under management is invested and managed internally. All of the active management portion is managed externally.

From April 1, 2010, to June 30, 2013, the objective of this composite was to replicate the return on the MSCI EM Index.

A portion of the composite's assets is allocated to external managers, except for the period between April 1, 2010, and June 30, 2013.

Securities lending and borrowing as well as securities sold short are permitted in the composite within authorized limits.

2. Composite creation date

The composite was created on October 1, 2002.

3. Benchmark index

Since July 1, 2013, the benchmark index for this composite is composed of MSCI EM (Unhedged) and MSCI China A. The latter consists of Chinese securities available only to domestic investors and certain qualified foreign institutional investors. A portion of the MSCI EM (Unhedged) is substituted by a China A portion, proportionally to la Caisse's investment right in this index. The change to the benchmark index was to better reflect the makeup of the composite which now contains China A activities.

Until June 30, 2013, the benchmark index was the MSCI EM (Unhedged).

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 25 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 22 basis points. The impact of adopting this methodology is -2 basis points for the 12 months ended December 31, 2014 and 0 basis point for the previous four years.

Private Equity

Notes to the Private Equity composite:

1. Composite description

This composite consists of private equity activities that specialize in the following types of investment: leveraged buyouts, growth capital, venture capital, distressed debt, mezzanine debt and restructuring.

Some assets originally in the Investments and Infrastructures composite were transferred into the composite on July 1, 2010, as a result of the revised portfolio offering and the closing of the Investments and Infrastructures composite.

The composite uses derivative financial instruments in the normal course of investment management. Derivatives are used to hedge interest rate and currency risk, or to hedge a position in the portfolio.

At each valuation date, the fair value of the investment funds is provided by the general partner. This valuation is then compared with the audited financial statements provided by the general partner. These funds represent 44% of the composite's assets.

2. Composite creation date

The composite was created on October 1, 2003.

3. Benchmark index

Since January 1, 2013, the benchmark index has consisted of 50% State Street Private Equity Index Adjusted (Hedged) and 50% MSCI World Index (Hedged). This change to the benchmark was made to better reflect the makeup of the composite.

From July 1, 2010, to December 31, 2012, the benchmark index consisted of 70% State Street Private Equity Index Adjusted (Hedged) and 30% MSCI World Index (Hedged). The assets transferred into this composite on July 1, 2010, altered the composition of the composite, justifying the new benchmark.

From October 1, 2006, to June 30, 2010, the benchmark index consisted of 60% S&P 500 Index (Hedged) and 40% MSCI EAFE Index (Hedged). Sector and geographic changes in the composite's investment policy, as well as increased liquidity, justified the change in benchmark.

Before October 1, 2006, the benchmark index for this composite was the S&P 600 Index adjusted to reflect the investment types within the composite. Only the following sectors were included in the index calculations: consumer staples, consumer discretionary, health care, information technology, telecommunications and industrials. The sector weighting was fixed.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction and investment fund management fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and other fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 25 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 23 basis points. The impact of adopting this methodology is -3 basis points for the 12 months ended December 31, 2014 and -3 basis points for the previous four years.

Private Equity Index	11%

1. The descriptions of the indexes are given in the notes to each composite.

Notes to the Balanced Fund composite:

1. Composite description

This composite consists of all depositors' accounts, including the General Fund. It measures the overall impact of la Caisse's asset allocation strategy for all asset classes available to depositors. Treasury and overlay activities are also included in this composite. Since 2007, an unrealized loss on ABTNs has been recorded in this composite. Please see Note 4c) of the Consolidated Financial Statements for more details.

The composite may include derivative financial instruments in the normal course of investment management. Derivatives are used mainly to hedge positions, to reduce market risk, to take advantage of arbitrage opportunities, to replicate the benchmark, to accelerate investment or disinvestment, to hedge currency risk and interest rate risk and to match the duration of a composite to that of the benchmark index.

Leverage activities may be present in the composite, including securities sold short. The extent of the leverage depends on the nature of the investment. Some strategies have no leverage component while others are fully leveraged within the authorized limits.

A portion of the composite's assets is allocated to external managers.

In 2014, after the adoption of IFRS for the Real Estate Debt, Infrastructure and Private Equity composites, a change was made to the methodology used to value these components of the Balanced Fund. Refer to Note 3 of the General Notes for more details. The adoption of IFRS had no impact on the 2014 return of the Balanced Fund composite.

In 2012, after the early adoption of IFRS for the Real Estate composite, a change was made to the valuation methodology used for the Real Estate composite of the Balanced Fund. Refer to page 17 of this document for more details. The adoption of IFRS had a positive impact of 0.4% on the 2012 return of the Balanced Fund composite and an immaterial impact for 2013. For 2014, the impact on the composite's return is 0.1%.

2. Composite creation date

The composite was created on October 1, 2002.

3. Benchmark index

The benchmark index for this composite is an index created by la Caisse. It consists of the weighted average of the depositors' benchmark indexes. These indexes correspond to the weighted average of the indexes of each investment class as specified in the reference policy of each depositor. The depositors' reference policies are established once a month according to the depositors' preferences and needs, as well as market forecasts. The benchmark index also contains a certain level of exposure to currencies and a duration adjustment as defined in the reference policy of each depositor. The weight of each index that makes up this composite's benchmark index as at December 1, 2014 is presented in the table on the previous page.

4. Calculation period

The return on the composite is calculated from January 1, 2005, to December 31, 2014.

5. Operating expenses and other fees

The returns are calculated before operating expenses and other fees, but net of transaction fees, expenses related to real estate subsidiaries and investment fund management fees. Since January 1, 2014, operating expenses and other fees in basis points have corresponded to the ratio of actual expenses incurred on average net assets. For the previous four years, the ratio corresponds to the average of the annual ratios. Before January 1, 2014, operating expenses and fees presented corresponded to the impact of fees on returns, namely the difference between the return calculated before fees and the return calculated after fees. The calculation methodology has been adjusted to better reflect the management of fees and to facilitate comparability between the years, as this method is less volatile.

For the 12 months ended December 31, 2014, the operating expenses and other fees for this composite are 16 basis points. In the previous four years (January 1, 2010, to December 31, 2013), the fees averaged 19 basis points. The impact of adopting this methodology is -2 basis points for the 12 months ended December 31, 2014 and -2 basis points for the previous four years.

II. Financial statistics and review

1. Changes in net assets	41
2. Statement of income and changes in net assets under management	42
3. Changes in depositors' holdings	43
4. Breakdown of depositors' holdings	50
5. Annual interest or income paid out on average deposits	51
6. Summary of investments	52
7. Breakdown of investments	53
8. Real Estate sector – Mortgages of \$5 million and over	55
9. Investments in shares and bonds of publicly traded companies	64
10. Investments in shares and bonds of privately held companies	146
11. Statement of real estate holdings	159
12. Statement of properties held for resale	161

5 ANNUAL INTEREST OR INCOME PAID OUT ON AVERAGE DEPOSITS
 (rate as a percentage)

CATEGORIES OF DEPOSITS	2014	2013	2012	2011	2010	2009	2008	2007	2006	2005
Demand deposits ¹	1.00	1.00	1.00	1.00	0.61	0.61	3.11	4.35	4.01	2.71
Term deposits ¹	1.81	1.54	1.47	1.69	0.78	1.39	3.55	4.38	3.78	2.79
Participation deposits ²	6.88	6.64	5.74	4.00	1.76	1.14	0.65	8.32	7.82	6.75

¹ The General Fund receives demand and term deposits from depositors and pays out interest on these deposits. The rate indicated is the average rate paid out during the year

² Income earned on the investments of La Caisse's General Fund and Individual Funds is paid out or allocated to participation deposit holders. The rate indicated is the average annual rate. The rate represents only the income accounted for during the year on depositors' investments. It does not account for the changes in the fair value of investments. For purposes of this calculation, participation deposits are computed at cost. The rate is different from the time-weighted rate of return which includes both income and changes in the fair value of investments.

INVESTMENTS IN SHARES AND BONDS OF PUBLIC COMPANIES

as at December 31, 2014

(fair value - in millions of dollars)

Notes that are important to understand the table:

This table lists the major investments in corporate shares and bonds of public companies of la Caisse and underlying investments from its non-consolidated subsidiaries. This table is subject to the disclosure standards applicable to the annual list of such investments. In addition to these investments and according to the investment policies of the specialized portfolios, the managers use derivative financial instruments that generate a return on the Caisse's equity securities, without these securities being the property of La Caisse.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Notes that are important to understand the table:

This table lists the major investments in corporate shares and bonds of public companies of la Caisse and underlying investments from its non-consolidated subsidiaries. This table is subject to the disclosure standards applicable to the annual list of such investments. In addition to these investments and according to the investment policies of the specialized portfolios, the managers use derivative financial instruments that generate a return on the Caisse's equity securities, without these securities being the property of La Caisse.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

INVESTMENTS IN SHARES AND BONDS OF PRIVATE COMPANIES

as at December 31, 2014

(fair value - in millions of dollars)

Value of investments:

A = \$0 to \$5 million	C = \$10 to \$30 million	E = \$50 to \$75 million	G = \$100 to \$150 million	I = \$300 to \$500 million
B = \$5 to \$10 million	D = \$30 to \$50 million	F = \$75 to \$100 million	H = \$150 to \$300 million	J = \$500 million and over

Notes that are important to understand the table:

This table lists the major investments in shares and bonds of private corporations of la Caisse and underlying investments from its non-consolidated subsidiaries. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Pursuant to agreement, the specific value of investments in any private company (according to the definition provided in the Québec Securities Act) does not appear in this list unless the company has agreed to such disclosure.

Notes that are important to understand the table:

This table lists the major investments in shares and bonds of private corporations of la Caisse and underlying investments from its non-consolidated subsidiaries. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of La Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, an ongoing transaction or series of ongoing transactions or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of La Caisse at December 31.

Pursuant to agreement, the specific value of investments in any private company (according to the definition provided in the Québec Securities Act) does not appear in this list unless the company has agreed to such disclosure.

¹ Underlying investments from non-consolidated subsidiaries of Ivanhoé Cambridge Group and Otéra Capital.

² Investment made or held by La Caisse or a subsidiary created pursuant to section 37.1 of the Act respecting the Caisse.

³ Investment made or held by La Caisse or one of its subsidiaries pursuant to the last paragraph of section 37.1 of the Act respecting the Caisse.
