Message from the Chairman and CEO

A global approach to fund management

In 2000, the Caisse de dépôt et placement du Québec remained steadily on course in terms of its objectives for growth and profitability. In addition to setting its sights on quality returns, it strove to increase assets under management by securing additional clients and earning new management mandates.

As a result, despite a dramatic drop in global financial markets, not only did Québec CDP preserve the integrity of its capital, it also brought up the total assets managed by its teams to \$125 billion. This rise in critical mass enhances its capacity as a player on world markets and enables it to attract the most talented managers, two essential ingredients in maintaining its position as a worldwide leader in fund management.

Remarkable performance in difficult times

Turbulent times are often an ideal opportunity for winning investment approaches. In 2000, the diversification strategy based on sector, geography and product, proved once again successful, producing an overall return of 6.2%. This is remarkable considering the negative performance on many financial markets around the world. The "Caisse way" is an active management approach featuring a well-considered combination of boldness and caution. This year, Québec CDP achieved an added value of \$996 million over the results that managers would have generated if they had simply reproduced their benchmark indices. Furthermore, total investment income and gains on the sale of investments reached \$10.7 billion. Net income totalled \$4.9 billion.

From 1996 to 2000, the management teams outperformed their benchmark indices, generating an average annual return of 12.2%. Over the same period, cumulative income from investments reached \$37.5 billion. For the six-year period from 1995 to 2000, the overall return stands at 13.2%. All in all – come rain, come shine – CDP group stands out because of the quality of its performance, a long-term insurance policy for clients who can count on the stability and growth of their capital

A well-defined growth strategy

The strategy for increasing assets under management represents the culmination of a rethinking process that led to the adoption of four major corporate objectives. These act as guideposts, keeping Québec CDP on track as it ventures further into the global market.

Ranking among the world's best fund managers

CDP was named "Best Fund Management Group in Canada" by the Reuters Survey 2000, a poll of 292 publicly traded Canadian companies. Québec CDP will use this momentum to carve out a position for itself as one of the top fund managers in the world.

Offering its fund management services to new clients

Securing new clients will play a key role in our plans to increase assets under management. This objective will be realized largely outside Canada, where we intend to lend our expertise to other pension and investment funds. This year alone, two Hungarian pension plans entrusted their funds to CDP Global Asset Management's team of experts in major financial markets.

Increasing private equity investments

Over the past six years, the proportion of private equity investments in the overall portfolio has grown consistently. This has been a winning strategy both for our returns and for numerous portfolio companies.

Establishing the framework to attain our goals

This objective was instrumental in the decision to consolidate our Québec operations in two central locations, in Montréal and Québec City. The construction of a new business office in Montréal and the development of Québec City's Price building as head office will enhance the synergy among the various teams that make up the CDP group.

Up to new challenges

Becoming a worldwide leader in fund management is a decidedly grand goal, but Québec CDP is more than equal to the challenge.

To achieve this objective, we will continue to rely on our far-reaching global network of partners, which includes many highly respected and influential players. These companies provide invaluable support to our core portfolio, private equity and real estate activities. A partnership approach is frequently a preferred means of investing, not only because it reduces the level of risk by lowering the costs of an investment, but also because it enables us to join forces with companies whose sound expertise often complements our own.

With assets under management growing consistently – they climbed from \$46 billion to \$125 billion over the past six years alone – we have the financial resources needed to spring into action when the right business opportunities arise. Alone or in partnership, we have the ability to rapidly free up the capital required for strategic investments.

Most of all, Québec CDP sets itself apart from many of its peers by actively managing nearly all its assets. This in turn requires highly qualified, skilled and creative human resources. Our managers have a thorough knowledge of the market sectors, geographical areas and products in which they invest, and strive to remain on top of the latest economic, political and financial developments that are likely to have an impact on their activities.

On behalf of the Board of Directors, I thank and congratulate each and every one of our teams for their achievements in 2000. Their expertise and dedication are at the very root of these outstanding results.

I would also like to extend my appreciation to all the members of the Board of Directors for their sound advice and unwavering support, and for the trust they place in us.

Jean-Claude Scraire

A world leader in fund management

With total assets of \$125 billion under management, the Caisse de dépôt et placement du Québec offers a broad range of fund management services worldwide. The institution is the leading fund manager in Canada and among the largest portfolio managers in the Americas.

Québec CDP manages the largest portfolio of Canadian stocks, is the major holder of Québec public sector bonds and has the largest real estate portfolio in Canada. Its diversified holdings in the commercial, residential and office sectors are actively managed primarily by CDP Real Estate subsidiaries. CDP is also Canada's leading private equity and venture capital investor. The CDP Private Equity subsidiaries offer a very broad range of financial products to Québec, Canadian and foreign businesses. In addition, the CDP Accès Capital network, comprising 12 business offices covering Québec and the Maritimes, is the local gateway to the services offered by CDP.

Québec CDP seeks to preserve capital under management and to obtain an optimal return on its investments while contributing to the vitality of the economy wherever it invests.

The institution is active on five continents, managing its North American operations mainly from its business offices in Montréal and Québec City. Some of its subsidiaries also operates from New York, Toronto, Vancouver, Bilbao, London and Mexico City. CDP is present in Europe with offices and representatives in Paris, Brussels, Warsaw and Budapest. In Asia, it has offices in Hong Kong, Tokyo, Bangkok and Seoul. It is also active in Latin America, in Buenos Aires.

As the largest Canadian investor in foreign markets, CDP has become a major financial partner in many investment funds worldwide. These financial partnerships give the hundreds of businesses in which CDP has an interest access to networks that greatly facilitate their international expansion.

Year 2000 highlights

Caisse named the best fund manager in Canada

Québec CDP is the leading fund manager in the minds of the managers of publicly traded Canadian companies. In the Reuters Survey 2000 conducted by Tempest Consultants, Québec CDP won hands down and was ranked the best fund manager in Canada. The survey findings reflect the opinions of 292 Canadian companies whose stock market capitalization represents 85% of the TSE 300. The companies were asked to evaluate the management methods of more than 50 fund managers.

CDP beats benchmark indices

Although the world's stock markets fell significantly in 2000, Québec CDP preserved the integrity of the capital it manages. In addition to producing a positive overall return in 2000, CDP achieved returns equal or superior to its benchmarks for all asset classes, including equities, real estate and mortgages. This performance results once again increased total assets under management, which stood at \$125 billion as at December 31, 2000.

Consolidation of CDP's operations

During the year, CDP group took steps to consolidate its operations in Québec when it acquired the Price building in Québec City on an emphyteutic lease and launched the project to build a new business office in Montréal. Ultimately, all CDP staff in Québec will be mostly concentrated in these two locations. A new office was also opened in Paris, which is now the main gateway to CDP's European activities.

Québec City head office

About 100 people work for the CDP group in the Québec City region in various buildings. These employees are to be concentrated in the Price building, an Art Deco gem in Old Québec. Major renovations are currently under way and will be completed in the spring of 2001.

Montréal business office

The new Montréal business office is under construction in Montréal's international district (Quartier international de Montréal), located strategically between the downtown business district, Old Montréal and the Cité du multimédia. The new building, which will feature new information and environmental technologies, will house some 1,500 employees. Occupancy is scheduled for late 2002. A live on-line view of the building's progress can be seen at www.cdpcapital.com/destinationcdp.

Europe office

Québec CDP has had a business office in Paris since January 2000. It serves as the main gateway to operations in Europe, and its staff work closely with all the teams in the various investment sectors in Québec. The team at the Paris office covers Europe in its entirety and all CDP group investment sectors. The staff will be doubled in 2001, to about 15 investment professionals.

Creation of Quebecor Media

The creation of Quebecor Media, after the offer to purchase Vidéotron's shares, was without doubt one of the major events of 2000. A new company that combines print and electronic media, cable, Internet access, creation of Web content and technology, Quebecor Media is part of the global trend toward the synergy of pipes and content that was much in evidence during the year.

Acquisition of Cambridge Shopping Centres

On October 1, 2000, Cambridge Shopping Centres Limited (Cambridge) became a wholly-owned Ivanhoe subsidiary. The Company acquired all Cambridge shares in a more than \$500-million transaction and then took the company private. Cambridge is one of Canada's main real estate companies that specialize in shopping centres. The acquisition enabled Ivanhoe to significantly increase its quality properties in Canada. The two companies merged in 2001.

Acquisition of Acanthus Real Estate Corporation

Cadim has a new wholly-owned subsidiary, Acanthus Real Estate Corporation, having acquired all its shares during the year. Publicly held Acanthus specializes in the residential sector and has a high-quality pan-Canadian portfolio of properties worth some \$480 million.

Creation of CDP Korea Telecom and Infrastructure Fund

CDP Private Equity was mandated by Korean partners to head and manage a US \$500-million fund that will invest in the infrastructure and telecommunication sectors in South Korea. The CDP Korea Telecom and Infrastructure Fund has already attracted a number of prestigious Korean investors: Korean Development Bank, Hanvit Bank, Samsung Life Insurance Company, Kyobo Life Insurance Company and Tong Yang Investment Bank.

Strategic partnership in the entertainment industry

CDP Capital Communications made an investment in Mosaic Media Group, a U.S. group involved in production of records, films, television programs and Internet content, as well as talent management. In addition to providing an opportunity to partner with one of Hollywood's leading suppliers of films, television program, musical recordings and new media content, this strategic investment will benefit the Québec companies that are CDP group partners.

Fund management for new clients

Québec CDP continued its efforts to offer its fund management services to new clientele. Its new clients include the pension funds of Hungary's armed forces and Ministry of Agriculture employees, and Maestral Mutual Funds, a new member of the Desjardins family of funds.

In addition, in its real estate operations, SITQ IMMOBILIER now manages buildings in the Paris for the SPID fund of the Caisse des Dépôts et Consignations, a prominent French institutional investor, to which it sold 20% of its interest in the buildings. Cadim also acquired a major interest in The Praedium Group, a U.S. company whose real estate investments total over US \$2 billion. This transaction has enabled Cadim to tap into an extensive network of investments and investors in the United States.

New business solutions for SMEs

A number of new business solutions were launched during the year, mainly for Québec SMEs:

- *Term loans from \$1 million to \$15 million* are now offered to rapidly growing SMEs that require substantial funds to continue expanding.
- *Imprésario*, a business solution for Québec's cultural and communications companies, provides investments of up to \$2 million and offers sophisticated professional services.
- *InnovAccès*, for sponsored companies, will enable early-stage sponsored technology companies to rapidly obtain additional venture capital to accelerate their growth.
- *The recreation and tourism sector* can count on a new team that focuses exclusively on investments in the sector. Three CDP group subsidiaries will provide financing in the form of private investments (debt securities, shares and other participating securities).
- *Accès Relève*, a turnkey financial product, is designed to facilitate the orderly transmission of SME ownership to family members or to company managers. It is adapted to the entrepreneur's tax situation and accompanied by a succession and management-support plan.

Year 2000 economic context

The year 2000 marked the peak of an uninterrupted 10-year period of economic growth. During the year, the rapid increase in output in the industrialized and emerging economies increased income and employment alike.

Certain major structural changes reached maturity. After several years of incubation, substantial productivity gains were recorded as a result of technological innovation and massive investment in leading-edge companies. Not only did the rate of economic growth increase, but its level was raised permanently. These technological changes also pushed up standards of living.

Productivity gains contributed to overall price stability, as well. Although energy costs more than tripled during the year, inflation remained remarkably tame and wage pressures were contained. Moreover, fierce competition in the global economy prevented companies from passing higher costs on to their customers.

As for cyclical factors, vigilance on the part of the central banks contributed significantly to the environment of low inflation. The monetary authorities deftly continued the tightening begun in 1999, avoiding an inflationary spiral and slowing their economies appropriately in the second half of the year.

The benefits of improved public finances became apparent in 2000, as budget surpluses in North America allowed for partial debt repayment and income will finance tax cuts in 2001.

United States

Economic growth in 2000 was the strongest of the past five years, coming in at more than 5%, yet inflation remained in check. Productivity gains more than offset the higher wages caused by low unemployment. Tightening of credit by the Federal Reserve Board and the dollar's persistent strength cooled the economy in the second half of the year, as expected.

Canada

Canada also posted vigorous growth approaching 5%, as a result of strong domestic demand and exports to the United States. The economy benefited from rising incomes and a steadily falling unemployment rate, without undue inflationary pressures.

Québec participated fully in this trend, and its growth was close to the Canadian average; a substantial drop was also recorded in its unemployment rate. High-tech investments and exports were especially strong, resulting in the creation of quality jobs.

Europe

The euro zone had a positive year, with growth of about 3.5% and tame inflation. The unemployment rate continued to fall. The fledgling European Central Bank had to defend its new currency, but managed to limit the risk of inflation by slowing the economy in the second half of the year. The United Kingdom surprised observers with growth of about 3%, a low unemployment rate and inflation of slightly more than 2%.

Japan

Japan's economic growth was disappointing at barely 2%. Unemployment remained low and deflation held sway.

Emerging markets

Emerging markets avoided major crises, although the situation was at times tense in Argentina and Turkey. As in the industrialized countries, growth peaked in 2000. It was especially strong in Asia (in excess of 7%), robust in Eastern Europe (5%), and sustained in Latin America (4%). Inflation was contained, and the unemployment rate generally fell.

Commodities

There was no pressure on commodity prices, with the exception of the spectacular increases in oil and gas prices, which curbed consumer spending and contributed to the slowdown.

Financial markets in 2000

Bond market

Major industrialized countries

Ten-year bond rates in the industrialized countries generally fell in 2000. They dropped 135 basis points in the United States, 85 basis points in Canada and 60 basis points in the United Kingdom, but were almost unchanged in Japan.

In the United States, 10-year bonds began the year at 6.4% but ended it at 5.1%. In Canada, rates followed the same trend, going from 6.2% to 5.4%. The yield spreads between Canadian and U.S. 10-year bonds thus narrowed by 47 basis points.

In Euroland, the average rate on 10-year bonds went from 5.5% to 4.8%, a drop of 64 basis points. The yield spreads in comparison with the United Kingdom's 10-year bonds thus shifted slightly in favour of the U.K.

Ten-year Japanese bonds offered the lowest returns of all the G7 countries, with their rates almost unchanged at 1.6%. The accumulated budget deficits that pushed public debt up to 120% of GDP were definitely a contributing factor.

Emerging markets

Bond markets in the emerging economies generally had a difficult year. The yield spreads between their securities and U.S. bonds increased from 800 basis points at the beginning of the year to 865 basis points at the end of December. Still, they experienced violent fluctuations during the year:

- Tighter monetary conditions around the world, Argentina's economic and financial situation, and political uncertainty in Southeast Asia had a negative impact;
- The situation in Northern Asia, especially China, which posted solid growth, and the improving Russian economy had a positive impact.

Corporate bonds

In the United States, corporate bonds traded on public markets offered lower yields than those of U.S. Treasury bonds. A few large U.S. corporations saw the value of their bonds plummet, including Xerox, J.C. Penney, Crown Cork & Seal and Armstrong, which no doubt increased investors' aversion to risk.

Money market

Generally speaking, the central banks raised interest rates in 2000. The U.S. Federal Reserve tightened three times, in February, March and May, for a total of 100 basis points during the year. The Bank of Canada followed suit.

Elsewhere in the world, the European Central Bank raised interest rates 175 basis points to support the euro, which fell significantly. The Bank of Japan also increased rates, by 25 basis points.

Foreign exchange market

On the foreign exchange market, the dominant factor was without doubt the sustained strength of the US dollar. It remained very strong against the G7 currencies as well as those of the emerging economies. The weighted price of the US dollar increased gradually during 2000 with a peak of 13% reached on November 24, only to correct downward toward year-end because of the uncertainty over a possible economic slowdown in the United States. For the year 2000, it appreciated 5.5%.

In Canada, although the economy was healthy, the currency weakened during the year. On a trade-weighted basis, the Canadian dollar eased 0.6%.

Continuing the trend begun in 1999, the euro struggled for most of the year, finally strengthening somewhat toward year-end. The flow of capital from Europe to the United States is the main reason for the new currency's significant depreciation. In the last quarter, the European Central Bank took steps to limit the damage, however. On a trade-weighted basis, the euro appreciated 0.7% in 2000.

In Japan, the yen was fairly stable for most of the year, despite repeated intervention by the central bank to contain it. The currency faltered, however, at the end of the year. For 2000, the yen depreciated 8.4% on a trade-weighted basis.

Finally, the Australian dollar and the New Zealand dollar fell significantly, ending the year down 15%.

Stock markets

The world's stock markets had a volatile year. Obsessed by the future, rather than the present, the markets reacted negatively to monetary tightening by the central banks, oil price hikes and the weak euro – all factors that clouded the outlook for corporate profit growth. Uncertainty over the extent of the slowdown caused extreme volatility.

The factor that had a major impact on most of the markets was undoubtedly the steep decline of all technology issues after the Internet bubble burst in the spring. Indeed, the markets have had great difficulty assessing Internet securities since they hit the stock exchanges; all the experts agreed that these stocks were substantially overvalued. So the correction they underwent in March is a healthy process which probably brought them back down to more appropriate levels.

Canada

Since Canada's economy takes its cue from the economic and financial environment in the United States, the TSE 300 did not escape the impact of NASDAQ's precipitous decline. Canada had the world's best-performing stock market for a good portion of the year, with the TSE 300 up 35% in the first eight months. But in Canada the technology bubble burst a little later than it did in the United States; the TSE 300 lost more than 13% of its value in the last quarter but ended the year up 7.4% from its level on January 1, 2000. Nortel alone fell 26% on October 25.

Unlike the previous year, where the TSE 300's increase was due to the Nortel security whose stock market capitalization represented a third of the index. On the contrary, nine of the 14 sub-indices had a positive return, especially energy and the

CHANGES IN THE TSE 300 INDEX

Source: Reuters

financial sector. Finally, the factors that contributed to the extraordinary run-up of the Canadian market remained in place. Canadian equities are still a bargain in relation to foreign securities, owing to lower price/earnings multiples, higher increases in profits and greater liquidity than in the other industrialized countries.

Among the year's events were the conversion of the Montréal Stock Exchange into an electronic exchange specializing in derivatives and the establishment of NASDAQ's Canadian head office in Montréal, a development that will create a world of financing opportunities for Canada's new economy companies.

CHANGES IN THE NIKKEI 225 INDEX

Source: Reuters

United States

The U.S. stock market suffered a serious setback in 2000, its first since 1990. At year-end, the S&P 500 had shed 9.1% of its value, in local currency, since January. The NASDAQ plummeted 54% from its March high, dragged down by technology issues.

In the spring, the market put an end to the speculative euphoria which led to overvalued stocks and was caused by the so-called new industrial revolution. Many new economy marquee stocks – Intel, Lucent, Microsoft and Apple among them – lost close to half their value.

Still, as in Canada, certain sectors recorded appreciable gains, especially interest-rate-sensitive sectors.

Europe

The European stock market did not escape the turmoil. In addition to feeling the chill of the tech downdraft, the European exchanges responded negatively to the weak euro, which caused European capital to flow into the U.S. stock market. Moreover, the currency's low value amplified the impact of the spiralling price of oil, denominated in US dollars, and this was reflected in the stock markets. The DAX ended the year down 7.5% and the FTSE 100 fell 10.2%, while the CAC 40 was down 0.5%.

Asia

In Japan, the erratic economic recovery and the controversial policy of tighter monetary conditions caused a severe correction on the Tokyo Stock Exchange in 2000, with the Nikkei 225 ending the year down 27.2%.

Elsewhere in Asia the situation was hardly more encouraging. The slow pace of reform and the political uncertainty in Southeast Asia tended to depress stock market returns. The situation was a little more positive in Northern Asia, especially in China where the Shanghai B rose more than 100%, propelled mainly by the country's solid economic growth.

South America

Several factors concerned investors in South America, especially uncertainty over Argentina's ability to roll over its debt. Its economy was stifled by the overvalued peso, which is pegged to the powerful US dollar. With the exception of Brazil, whose Isoma index ended the year up strongly, the South American stock markets were generally down.

CHANGES IN THE S&P 500 INDEX & NASDAQ

Source: Reuters

Real estate market

The real estate sector in all the industrialized countries is approaching the top of the cycle. In Canada, demand remained strong in 2000 and continued to rise in most sectors. New inventory was limited, and the risk of overconstruction remained low. In the United States, office-space supply and demand regained their balance in the major urban centres. The residential rental market strengthened. Housing prices rose, since the increased supply of quality products still did not meet the demand. Moreover, a few major North American corporations sold their real estate portfolios, creating a supply of products that benefited investors such as CDP.

Real estate investment trusts and publicly traded companies listed on the Canadian and U.S. stock markets recovered during the year, especially from the second quarter on.

The markets in Central Europe, especially Poland, Hungary and the Czech Republic, are at different stages of their growth and continue to offer investors favourable risk-return ratios. Other markets, which are at the bottom of the cycle, should also be monitored, especially Italy.

In Japan, the new standards adopted by the government are encouraging companies to clean up their financial statements, and a number of companies have become aware of the benefits of divesting themselves of their real estate portfolios. Transactions involving quality properties have already begun.

South Korea also offers excellent real estate investment opportunities: its economy is growing strongly, interest rates are relatively stable and unemployment is low. Moreover, the real estate market is at the bottom of the cycle and ready for an upturn; vacancy rates are low, land values are rising slightly and rents are creeping up.

Mortgage market

Mortgage rates fell in Canada during the year, with five-year commercial mortgage rates dropping from 8.2% to 7.2% from January to year-end. Inflation remained steady – a situation that favoured a gradual drop in interest rates.

Securitization transactions also increased during the year. Five new issues of commercial mortgage-backed securities (CMBS) were floated, for a total of \$1.2 billion, an outstanding advance for CMBS, which have been seen in Canada only since late 1998.

In June and October, CDP Mortgages floated two new CMBS issues, for a total of \$486 million, representing slightly more than a third of Canadian public issues in 2000. Other institutions also conducted securitization transactions to the tune of \$735.1 million.

CMBS appeal to an increasing number of investors seeking a diversified and balanced portfolio.

Risk management and calculation of returns

The special attention that Québec CDP has devoted to risk assessment and management has earned it an enviable reputation. CDP is now regarded as an industry leader in the field.

CDP measures risk using the value at risk (VaR) method, which is based on a statistical evaluation of the volatility of individual market positions and their correlation. In this way, the team of specialists responsible for this task, who are independent of the teams of portfolio managers, can regularly monitor the risks presented by individual portfolios. They can then assess the risk of each of CDP's asset categories and its overall portfolio and determine the asset allocation that will achieve an optimal risk-return balance.

The institution also uses risk-evaluation methods associated with cash securities and derivatives. To that end, it takes into account absolute risk related to market fluctuations, and relative risk related to benchmark indices.

Risk management is the ultimate responsibility of the Board of Directors and is delegated to the managers so that it is incorporated into the institution's operations. It involves an independent assessment to ensure that decisions are consistent with the business plan and the risk policies.

During the year, CDP group therefore created an integrated risk management committee. The Committee plays an advisory role and does a neutral risk-management review for the institution as a whole. Its role is to incorporate all aspects of risk (market, credit, liquidity, operational and legal) into a consistent, comprehensive strategy.

Calculation of returns

The calculation of returns meets the requirements of the Association for Investment Management and Research (AIMR). An audit performed by Aon Consulting certifies that the presentation of results and the calculation of returns comply with AIMR standards.

Québec CDP managers aim to outperform the benchmarks on the various markets for each asset class over periods varying from 3 to 5 years. Its main benchmarks are the SCM 91-day Canadian T-Bill Index, the SCM-Universe Bond Index, the TSE 300 Index, the S&P 500 partially hedged, the MSCI-EAFE partially hedged and the MSCI-EMF unhedged indices for foreign markets, and the AON real estate index.

Québec CDP, one of the few institutions to obtain external certification of compliance with AIMR standards

The Association for Investment Management and Research (AIMR) is an international organization dedicated to the continued professional development of financial sector specialists. The AIMR devotes special attention to the training of financial analysts through its program leading to the chartered financial analyst (CFA) designation, as well as ongoing training of these analysts. The AIMR places special emphasis on professional ethics. It has issued a very strict code of ethics that all its members are obliged to abide by. In light of the importance of performance results, for the industry and the general public, the AIMR has also produced the AIMR-PPS Handbook, a guide that deals exclusively with standards that the industry as a whole is strongly encouraged to adopt in reporting its performance.

The AIMR-PPS standards have two main objectives:

- to achieve greater uniformity and comparability of performance presentation;
- to promote full disclosure and fair representation of performance results.

These objectives are intended to allow potential clients to choose their portfolio managers in an enlightened manner. Since the returns obtained by managers play a major role in such selection, it was important for the AIMR to give this matter its full attention.

The AIMR is well aware that the AIMR-PPS standards have to be updated regularly to keep pace with the rapid changes in the financial industry. That is why it insists on professional governance and full disclosure of relevant information with respect to returns. To that end, the Association is updating the AIMR-PPS standards to bring them into line with the *Global Investment Performance Standards (GIPS)* that were introduced in 1999 in response to the globalization of financial markets, managers and clients.

Here are some of the standards established by the AIMR-PPS:

1. Total return must be presented, including realized and unrealized gains, plus income.
2. Returns must be calculated according to the time-weighted method.
3. The return on any portfolio must include the return on cash and cash equivalents.
4. Returns must be presented for a minimum of 10 years, if available.
5. The return must be presented for each year.
6. The market value of a portfolio must include accrued interest on bonds.
7. All portfolios under discretionary management must be included in the performance of at least one composite portfolio. A composite portfolio is defined as portfolios having the same strategy or the same objective.
8. To determine composite-portfolio performance, each portfolio must be weighted according to its market value at the beginning of the period.
9. The return must be calculated after deduction of commissions associated with operations.
10. Real estate must be appraised by an independent firm at least once every three years.

Overall return and asset growth

Although the world stock markets were down sharply in 2000, Québec CDP succeeded in preserving the capital it manages. The "Caisse way" enabled the institution to weather the storm and produce an overall return of 6.2%.

Investment activities generated total income and gains on the sale of investments of \$10.7 billion, while net income totalled \$4.9 billion. With net deposits of \$1.8 billion by depositors and management mandates received, total assets under management rose some 18% from \$106 billion as at December 31, 1999, to \$125 billion a year later.

Specialized portfolio returns

All the major stock markets were down significantly in 2000. Still, from a global perspective returns differed widely from one sector to another; certain industries, such as pharmaceuticals, were up almost 40% while others, such as telecommunications, were down almost 40%. Technology issues headed spectacularly south, with some stocks shedding as much as 80% of their value. Finally, lower long-term interest rates boosted the bond markets, which generally offered better returns than the stock markets.

Specialized short-term securities portfolio

Once again, active management of short-term securities contributed to the portfolio's positive return. The portfolio generated 5.8%, surpassing its benchmark, the SCM 91-day

Canadian T-Bill Index, by 33 basis points. The figures for 2000 were in line with the excellent returns posted in previous years, at 5.1% over five years, or 48 basis points above the benchmark. As at December 31, 2000, the fair value of the portfolio was \$980 million.

Specialized bond portfolio

As the world's stock markets tumbled in 2000, many investors turned to safe havens such as bonds. Indeed as at December 31, the North American bond indices had positive returns for the entire year.

Canada's SCM-Universe Index was up 10.2% on a year-to-year basis. Québec bonds offered better returns than Canadian bonds, although the yield spreads increased slightly.

Once again 10-year Canadian bonds produced better returns than their U.S. counterparts, and this also benefited the specialized bond portfolio.

Active management of the portfolio generated a return of 10.2%. The portfolio's five-year return is 8.5%, or 62 basis points more than its benchmark. As at December 31, 2000, the fair value of the specialized bond portfolio was \$32.3 billion.

QUÉBEC-CANADA: CHANGES IN 10-YEAR BOND SPREADS

Source : Caisse de dépôt et placement du Québec

Specialized Canadian equities portfolio

The Canadian stock market performed well in 2000, despite the correction toward the end of the year. Nine of the 14 sub-indices had positive returns, especially energy and financial services. The weight Nortel in both the benchmark and the portfolio had a marked impact on returns.

The specialized Canadian equities portfolio posted a 12.5% return, outperforming the TSE 300 by 507 basis points. Its five-year return is 18.7%, or 322 basis points above the benchmark. At year-end, the fair value of this portfolio was \$21.6 billion.

The Action Opportunité fund

The Action Opportunité fund made a total of 19 investments among which four were sold at profits by drawing on the synergy of the skills and know-how of all the managers in the CDP group and by capitalizing on outstanding investment opportunities. This fund makes investments that cannot be handled by one subsidiary alone and that go beyond the mandates of CDP Global Asset Management in terms of size, liquidity or risk. The fund targets world-class companies or those with the potential for high returns.

Specialized U.S. equities portfolios

Management styles vary for these portfolios. A portion of assets is managed actively in-house, another portion is entrusted to outside managers and still another is index-linked.

U.S. stock markets fell markedly in 2000. At year-end, the S&P 500 had shed 9.1% of its value. Nevertheless, as in Canada, certain sectors posted substantial gains, especially interest rate-sensitive industries.

The U.S. equities portfolios outperformed the partially hedged S&P 500 by 411 basis points, posting a -4.8% return. The five-year return is 17.7%, or 61 basis points over the index. In addition, the in-house active management of the specialized U.S. equities portfolios produced a 1.3% unhedged return in 2000, outperforming the index by more than 720 basis points. The five-year return stands at 22.6%, outperforming the S&P 500 by over 200 basis points, a performance in itself. As at December 31, the fair value of the portfolio was \$8.2 billion.

Specialized foreign and emerging markets equities portfolios

The stock markets in Europe, Asia and the emerging economies had a difficult year. European exchanges reacted negatively to the weakness of the euro, Japan's erratic economic recovery affected the Tokyo Stock Exchange, and the picture was not much brighter in Asia, with the possible exception of China, which posted solid economic growth. Apart from Brazil, the South American stock markets also had a dismal year.

In this context, the specialized foreign and emerging markets equities portfolios were down 8.6% on the year and outperformed the partially hedged MSCI-EAFE + EMF index by 38 basis points. The five-year return is 12.3%, or 163 basis points over the index. The fair value of these portfolios was \$10.6 billion at year-end.

BREAKDOWN BY SPECIALIZED PORTFOLIO

as at December 31, 2000

fair value – in percentage

Specialized real estate and mortgage portfolios

The active management strategy of the real estate teams, which favours portfolio turnover, not only locally but globally, involved taking full advantage of cyclical variations in the market. On top of that, the real estate market was especially fertile this year, and a number of large-scale operations raised the value of the portfolio significantly. The specialized real estate portfolio returned 18.3%, outperforming the AON index by 392 basis points. This portfolio's five-year return surpassed the benchmark by 261 basis points, reaching 15.0%.

The specialized mortgage portfolio returned an excellent 12.3%, surpassing the SCM-Universe benchmark by 210 basis points.

The fair value of these portfolios was \$7.7 billion at year-end.

Steady returns from 1996 to 2000

Québec CDP is noted for its steady returns, which are due to a cautious management style combined with a measure of boldness.

From 1996 to 2000, CDP achieved a remarkable performance, recording an average overall return of 12.2%. Over six years, the average overall return is 13.2%, while the longer-term 10-year return is 11.7%.

These remarkably steady results confirm Québec CDP's leadership position, now ranking solidly among the major fund managers.

REDUCED HEDGING OF THE OVERALL PORTFOLIO

Some major changes were made in Québec CDP's investment policies. The foreign exchange hedging policy was reviewed, and a decision was made to shift gradually from complete hedging to 50% hedging of the U.S. and foreign equities portfolios by the end of 2001. This change is intended above all to take advantage of the diversification associated with a currency portfolio.

CDP Global Asset Management

CDP Global Asset Management was created to serve an increasingly diversified global clientele and offers portfolio management services on liquid markets, drawing on Québec CDP's recognized expertise and 35 years of investment experience. Its mission is to obtain an optimal financial return above recognized indices, while ensuring preservation of capital through effective risk control. CDP Global Asset Management has total assets of over \$82.3 billion under management.

The Company has more than 60 highly experienced managers who combine expertise and competence with a rigorous investment process to achieve results that speak for themselves. The managers are divided into various autonomous and specialized teams according to their niche or management style. They also have access to a global network of information and specialized research.

CDP Global Asset Management also sets great store by continuous training, with a staff that includes a high percentage of managers who hold the CFA designation.

Active management and a multi-manager approach

The investment activities of CDP Global Asset Management are based on active management. Rather than merely mimicking the stock market indices, the managers themselves choose the securities in their portfolios, based on their perception of the markets.

CDP Global Asset Management also uses a multi-manager approach, rather than relying on star managers. The managers therefore work as a team, with each member responsible for a portion of the funds according to a well-determined mandate. This strategy relies on synergy among team members and complementary management styles, rather than emphasizing a single management style and a specific manager.

The individual managers make their own investment decisions within the bounds of the mandates they are given and in this way contribute to the group's results. Each decision is based on quantitative, fundamental or technical analysis. Transactions are carried out by seasoned traders, and an independent risk management team monitors the portfolios on a daily basis.

CDP Global Asset Management also awards mandates to talented external managers in the international arena, to take advantage of diversified management styles and complementary expertise.

New management mandates

CDP Global Asset Management obtained management mandates from new clients during the year, including:

- The pension funds of the Hungarian armed forces and the employees of the Hungarian Ministry of Agriculture.
- Four strategic Nova Mutual funds offered by Strategic Nova Funds Management, an integrated Canadian financial services company.
- A portion of three of the Cartier Mutual Funds offered to investors through the Mouvement Desjardins network and by Fiducie Desjardins.
- A portion of three of the Gestion Placements Desjardins's Maestral Mutual Funds, based on the multi-management approach.

Fixed income and currencies

Fixed income and currencies management is handled by more than 25 professionals who are divided into teams responsible for various financial instruments (short-term securities, currencies, etc.) and specializing in market segments (bonds issued by Québec, Canada, the United States, etc.). The team also has its own traders.

In managing the bond portfolios, the team emphasizes diversification by management style to optimize the risk-return ratio. Allocation by type of bond is managed actively on the basis of the business cycle and the state of the markets. In recent years, one of the overall strategies has been to increase the weighting of international and corporate bonds.

A separate team is responsible for hedging the portfolios held by the CDP group. In their tactical portfolios, these professionals hold short-term positions to take advantage of global currency movements.

In 2000, considerable effort was made to develop new expertise, especially in foreign exchange and management of international bonds. Specifically, as the year unfolded new management methods were put in place, and financial engineering expertise made it possible to explore ways of obtaining a superior return with no increase in credit risk. This operation involves replacing a portion of the Canada bond portfolio with interest rate derivatives so as not to change the portfolio's duration. The funds obtained in this way are allocated to a portfolio of high credit rating (AAA) securities, which are held until maturity because of their low level of liquidity.

The fixed income and currencies team has total assets of \$48.8 billion under management.

Stock markets

Sectorial equity management

The team responsible for sectorial equity management consists of more than 17 professionals who specialize by TSE 300 industrial sector (biotechnology, consumer products, distribution, energy, industrial products, communications, resources and so on). Thus, in addition to financial expertise, they possess thorough knowledge of the different sectors of the economy, which they share with their colleagues on the other management teams.

The approach taken by the team responsible for sectorial equity management is fundamental analysis based essentially on microeconomic factors (analysis of financial statements, evaluation of management, growth outlook, etc.).

This team has total assets of \$8.0 billion under management.

Specialized Canadian equity management

More than 10 professionals with extensive experience are responsible for specialized Canadian equity management. They each have their own management style (generalist, dynamic, etc.) and cover a highly specific segment of the Canadian market (small, mid and large caps, cyclical and non-cyclical sectors). The team, which has assets of \$7.7 billion under management, also has an arbitrageur who performs hedge fund-type operations and uses various strategies to take advantage of yield spreads among certain securities.

The diversified and complementary approach taken by the team responsible for sectorial management of Canadian equities is based on macroeconomic and microeconomic analysis.

Foreign equity

Of the 14 or so professionals who make up the foreign equity team, many have previous work experience abroad, and among them they speak a total of seven languages. Divided into teams that specialize by country or by region (United States, Japan and Asia, Latin America, United Kingdom, Continental Europe), they perform active management based essentially on fundamental analysis. They work in co-operation mainly with the sectorial management team, which provides them with sector-based research findings.

In addition to possessing in-depth knowledge of the companies they invest in, the managers on this team use styles adapted to the economic situation in each market. For instance, in recent years they have favoured a growth style for the United States and Europe and a sectorial and country-rotation approach for Asia.

The team also awards external mandates. This approach is used for diversification by management style or for investments in countries that the in-house managers are less familiar with. The amounts involved tend to decrease over the years.

The foreign equity team has total assets of \$17.7 billion under management.

Tactical investments

The tactical activities of CDP Global Asset Management aim to take advantage of global opportunities by using derivatives. Management decisions are made according to short-term movements on world financial markets arising from fundamental economic trends, variations in assets caused by economic and financial cycles, and investor sentiment around the world. The tactical managers have developed models to capture the variations created by these factors. All this is then incorporated into a global risk-management models.

In addition to the portfolio of tactical investments, CDP Global Asset Management manages internally, through its subsidiary Varan Tactical Asset Management, the Varan Fund, a hedge fund created in partnership with Northern Trust Global Advisors and available to institutional investors. The Varan Fund had two new clients at year-end.

Hedge funds aim for absolute returns, and are generally characterized by tight risk control. This management approach is therefore not correlated with traditional portfolio management.

Three funds of funds are managed externally, also in partnership with Northern Trust Global Advisors, to diversify the tactical management styles. These are the Multi-Strategy, Global Macro and Opportunistic funds. The last two funds distribute the Varan Fund.

The managers work in various locations around the world and have specific mandates. These funds of funds thus offer investors different management styles in a single product.

Strategic management of asset mix

The prime objective of this year is to add value to the portfolios by overweighting or underweighting certain asset classes and taking advantage of investment opportunities. By positioning the overall of the portfolio to take advantage of global structural trends, these activities aim to predict economic trends and movements on the financial markets over a horizon of 12 to 18 months. The managers take positions by shifting funds among the various portfolios or by using derivatives.

During the year, the main asset allocation strategies consisted in delaying the movement from bonds to equities and reducing equity positions in favour of real estate to offset the effects of markets that were flying high despite a U.S. economy on the verge of overheating and stock market valuations that were considered risky. This view of the market yielded substantial financial gains, as real estate outperformed stocks in 2000.

CDP Private Equity subsidiaries tear up and work hand-in-hand with business, from start-ups to major corporations, traditional to new-economy, local to international. They offer a broad range of financial vehicle and various types of support to businesses, and contribute to creating value for portfolio companies by opening up new horizons through business solutions designed to meet their particular needs.

As at December 31, 2000, the fair value of the consolidated portfolio held by the subsidiaries in the group totalled \$15.3 billion, up 27% from the \$12 billion recorded a year earlier. The portfolio has an average growth rate of 38% annually since the first subsidiaries were created in 1995. Private investments represented 12.2% of assets under management this year, versus 11.3% in 1999. No other institutional fund manager in North America is as involved in this type of investment.

The portfolio of private investments also includes many securities of Canadian companies. As at December 31, the value of the Canadian equities in the portfolio was \$10.6 billion, or 43% of the investments in the total value of the specialized Canadian equities portfolio.

The internal rate of return earned by the private equity subsidiaries on their portfolio of Canadian equities was 11.2% in 2000. The debt portfolio posted an internal rate of return of 7.4%.

As at December 31, foreign securities accounted for 45% of the value of the overall private investments portfolio.

Innovating for SMEs

CDP Private Equity is actively involved with Québec SMEs, especially through the CDP Accès Capital network. The overall portfolio, consisting of investments in 781 companies, includes 408 investments in Québec companies. In the case of 70% of them, the amount invested was less than \$5 million, an indication

of the importance of Québec small and mid-sized businesses in investment strategies.

Demonstrating their flair for innovation, during the year the private investment subsidiaries introduced several new business solutions tailored to the needs of SMEs.

CDP Capital d'Amérique now offers *term loans ranging from \$1 million to \$15 million* to rapidly growing SMEs that must meet substantial needs to ensure their expansion. Loans are generally amortized over 5 to 15 years, at fixed or variable rates. The interest rate and repayment conditions offered are well-adapted to the needs of entrepreneurs.

CDP Capital Communications launched *Imprésario*, a business solution for cultural and communications companies. In addition to making investments of up to \$2 million, *Imprésario* offers companies involved in audiovisual production, publishing, recording, variety shows, new media and art crafts sophisticated professional services from an in-house team that focuses exclusively on their expansion as well as providing specialized external resources. *Imprésario* also offers access to a global network of contacts and partners.

CDP Sofinov and CDP Accès Capital also launched a new plan for the financing of sponsored companies. With \$30 million of capital, *InnovAccès* will enable early-stage sponsored companies in the technology sector to rapidly obtain additional venture capital to ensure their growth.

A new team was also put in place and is dedicated exclusively to investments in the *recreation and tourism sector*. Promoters in this sector often lack the means to launch their projects in a viable and profitable manner. They will now have access to financing in the form of private investments (debt securities, shares and other participating securities). These investments will be made by CDP Capital d'Amérique and CDP Accès Capital, as well as real estate subsidiary Cadim.

Finally, CDP Accès Capital began in 1999 studying problems posed by the transfer of family businesses. The result was the launch of *Accès Relève* early in 2000. A turnkey financial product that facilitates the orderly transfer of SME ownership to family members or company executives, *Accès Relève* is geared to the entrepreneur's tax situation and includes a management succession and support plan. This innovative product is designed to ensure the sustainability of family businesses of all sizes and has generated much enthusiasm in the business community.

Investments in 2000

The private equity subsidiaries were very active during the year on an ebullient market. The teams authorized investments in 325 companies with a total value of \$6.2 billion in various sectors of the economy. In line with their policy of dynamic management of investments, the subsidiaries also kept to their asset turnover strategy and disposed of \$3.6 billion of assets.

CDP Accès Capital

During the year, Capital CDPQ and the 12 companies in the Accès Capital network were combined into a single entity: CDP Accès Capital. This merger made it possible to consolidate the financial products offered to SMEs and to simplify the offer of Québec CDP products.

CDP Accès Capital invests in SMEs in different sectors of activity and makes investments in the form of debentures, equities and loans ranging from \$50,000 to \$2 million. As at December 31, 2000, the Company's portfolio comprised investments in 134 companies and represented a total value of \$106.7 million. The internal rate of return for 2000 was 10,7%.

CDP Accès Capital studied 30 dossiers for Accès Relève, its new turnkey financial product designed to facilitate the transfer of SME ownership to family members or company executives. In all, six dossiers were authorized during the year.

Loans to sponsored businesses

CDP Accès Capital provided financing to 16 early-stage companies as part of its loans to sponsored businesses, for a total of \$3.2 million. The authorized investments include:

- \$125,000 in Groupe SNS of Saint-Joseph-de-Beauce, the developer of a mobile unit used to empty septic tanks.
- \$200,000 in NEKS Recherche et Développement of Laval, which manufactures an applicator used to seal off interproximal tooth surfaces.
- \$250,000 in Extensio Tech of Drummondville, the designer of an audioguide that provides information for tourists exploring an area on foot.
- \$250,000 in Hemera Technologies of Hull, an additional financing which it used to acquire GraphicCorp, a division of Corel Corporation, and to become the largest supplier of wholly-owned digital images.

Investments in SMEs

CDP Accès Capital authorized investments of some \$50 million in 89 Québec SMEs during the year. Some notable examples follow.

- \$500,000 in Consultants Akitek, a young company that was sponsored by the Centre d'entrepreneurship technologique de l'École de technologie supérieure de Montréal. The company markets an innovative product for artificial vision systems which has international potential.
- \$600,000 in Scierie Tech, a Lac Drolet sawmill that specializes in superior grades of white pine and hardwood. The investment was made as part of a project to construct four drying units.
- \$1.2 million in Les Produits Forestiers J.V. of Saint-Nicolas, to buy out a shareholder. The company manufactures decorative mouldings and furniture components.
- \$1.2 million in PV-Tron of Montréal, so that ownership of the company can be transferred to management. PV-Tron acts as an electronic components broker for the telecommunications industry, mainly in Europe and North America.
- \$1.5 million in ID Group of Chicoutimi, an investment made jointly with CDP Capital d'Amérique. The company, a CDP Accès Capital partner since 1997, designs software for management and implementation of lockout programs. The investment will enable it to step up its R&D and to sustain its sales on the U.S. market.
- \$1.6 million in Techn-o-Laser, a Sainte-Julie company that recycles laser and ink-jet printer cartridges. Techn-o-Laser is the Canadian industry leader and is expanding into the United States.

- \$2.3 million in Railquip Enterprises, an investment made jointly with CDP Capital d'Amérique to allow management to buy back company shares and also pursue expansion plans. The company produces composite panels used by the rail transport and construction industries.

Montréal Mode International

Created in 1999, Montréal Mode International is active in the fashion, accessories and related products industries, through partnerships, acquisitions and strategic alliances. In 2000, the Company's internal rate of return was 11.6%. New partnerships and two major investments were made during the year:

- The prominent Québec designer Marcel Dénoimé joined the company to give new impetus to the Dénoimé Vincent men's apparel label by enabling it to explore new export markets.
- The acquisition, as a result of a strategic partnership with four Québec entrepreneurs, of the North American assets and operations of Old River, a designer and retailer of men's clothing.
- The acquisition of Rio Sud, a company that designs and distributes men's and women's apparel. Rio Sud operates a chain of 11 stores.

During the year, Les Collections Shan has also pursued its expansion, notably in the U.S. and European markets.

CDP Montréal Mode Investissements

A financing and investment company, CDP Montréal Mode Investissements makes venture capital investments in companies in the fashion industry, using financial instruments such as equity investments, debentures and conventional financing.

During the year, CDP Montréal Mode Investissements invested in Esteem Fashions, a company that manufactures and distributes ready-to-wear for women, and Freedom, a retail chain that specializes in trendy clothing for teenagers.

CDP Capital d'Amérique

CDP Capital d'Amérique invests in mid-sized and large businesses with strong potential for superior returns and growth. It offers a broad range of financing products, with emphasis on equity investments and loans. As at December 31, 2000, the fair value of its overall portfolio totalled \$6.6 billion, distributed in 271 companies. The internal rate of return on the equity portfolio was 13.7%, while that of the debt portfolio was 8.1%.

The Company also manages a portfolio of Québec small-cap public companies whose value reached \$380 million in 2000, up from \$285 million in 1999. This portfolio is one of the largest small-cap portfolios in Canada. It returned 3.2% in 2000,

outperforming the Scotia Capital Québec Equity 60 Small Cap Index by 510 basis points. Since its creation five years ago, the portfolio has generated a compound annual return of 23.1%, or 270 basis points more than the Québec Equity 60.

Although share prices in this sector have dropped in the past two years, the Company continues to support these securities, with investments of \$165 million in 2000. The sector includes many high-quality companies with very attractive long-term growth potential.

During the year, CDP Capital d'Amérique authorized investments of almost \$1.7 billion in 68 companies. The investments include:

- \$25 million in Novacap of Longueuil, a fund that invests in Québec companies in all sectors of activity. This investment will increase the sources of financing for Québec businesses.
- \$48.5 million in Camoplast, a Sherbrooke company that is a leading manufacturer of polymer composite parts for recreational and other vehicles. This investment, made in the form of shares and loans, is a fine illustration of the one-stop financing capability – debt and equity vehicles – offered by CDP Capital d'Amérique. This investment was made jointly with Investissements Desjardins.
- US\$10 million in NutraSweet, a U.S. firm that has been the leading manufacturer of high-intensity sweeteners since aspartame was launched in 1983.
- US\$11 million in MHD Holding of Chicago, a manufacturer and distributor of food products sold under the Nathan's, Scott Petersen, Mosey's, Liguria and Mickelberry's brand names.
- A \$55 million mezzanine loan to Pollyconcept S.A., a French distributor of promotional products active in all Western Europe.
- \$22.1 million in the Mobile Storage Group, a U.S. company that specializes in container and trailer storage. The investment was made in partnership with Winward Capital Partners.
- US\$20 million in Automotive Sealing Systems Holdings, a Luxembourg manufacturer of automotive sealing products.
- \$43 million in Veterinary Centers of America (VCA), a joint investment with Leonard Green & Partners, L.P. VCA is a U.S. company that manages a network of veterinary clinics in the United States.
- \$89 million in General Healthcare of Great Britain, a company that manages private hospitals. BC Partners is the partner in this investment.

CDP Capital Communications

CDP Capital Communications specializes in financing for companies in the telecommunications, media and cultural industries sectors. Its strategy is to invest in rapidly growing companies, not only in Québec and elsewhere in Canada but also internationally. As at December 31, 2000, its portfolio stood at \$4.3 billion, up 18% from 1999, and comprised investments in 109 firms.

The sectors in which CDP Capital Communications invests have changed very rapidly in recent years. Although the sector is still growing, the share prices of the companies in the telecommunications and media industries experienced a difficult year. This situation is due partially to the euphoria on the NASDAQ in recent years, which led to the overvaluation of many companies, especially in the telecommunications sector. The NASDAQ plummeted 54% from its peak last March, dragging many securities down with it.

In this context, CDP Capital Communications pursued its strategy of partnering with well established companies and relying on its own and its partners' expertise to add value to its investments. Its three-year internal rate of return stands at 17.7%, while at -11.6% in 2000.

During the year, CDP Capital Communications also stepped up its efforts to support Québec companies, especially those in the cultural industries. With *Impresario*, it set the objective of becoming a major player in this area through high-calibre assistance as well as the nature of its investments.

The creation of Quebecor Media is without doubt one of the major developments of 2000. In September, Quebecor and CDP Capital Communications made an offer to purchase all the multiple voting shares of Groupe Vidéotron, through Quebecor Media.

Québec CDP will have invested a total of \$2.2 billion in the creation of Quebecor Media, excluding the transfer of the Vidéotron shares already held, for a total of \$500 million. Quebecor agreed to invest assets and \$1.035 billion in the company. Québec CDP and Quebecor hold respectively 45.3% and 54.7% of Quebecor Media. The new company brings print and electronic media, cable, Internet access, creation of Web content and technology under one umbrella, and will be one of Canada's largest communications groups.

The other highlights of 2000 include:

- An investment in Mosaic Media Group, a U.S. group involved in production of records, films, television programs and Internet content, in addition to talent management. Mosaic was launched in July 1999 and is a joint venture formed by Atlas Entertainment, Atlas-Third Rail Management, Third Rail Records and Gold Miller Company. This strategic partnership brings CDP Capital Communications together with one of Hollywood's leading suppliers of studio films, television programs, musical recordings and new media content. The companies in its portfolio will benefit from this alliance with Mosaic.
- The creation, in co-operation with CDP Capital International and Korean partners, of a US\$500-million fund that invests in South Korea's infrastructure sector. The fund will focus mainly on telecommunications, transportation, and oil and gas infrastructure, as well as water and the environment.

Various investments in companies were made during the year, notably:

- \$600,000 in Dynagram Software, a Québec City firm that specializes in the creation of custom software for document publishing and pre-press.
- A 20% interest in Diesel Marketing, a Montréal firm intent on reengineering itself to become the first company in Canada to offer "hybrid marketing," an approach that combines interactive and mass communication.
- \$1.9 million to assist Toon Boom Technologies with the creation and marketing of a new line of products designed for the Web animation market. Toon Boom Technologies is a Montréal company that has acquired a solid reputation in the animated design and animation market with its USAnimation® software, considered the best animation package by the industry. Major studios such as Warner Bros. and Paramount Pictures have adopted USAnimation®.
- \$9.5 million in Proxima Systems, a Montréal-based provider of customer care and billing software solutions for the cable television, telephony and Internet services markets.
- \$10 million in I.C. Axon, a Montréal firm that develops multimedia and E-learning solutions for the global healthcare industry.

CDP Sofinov

CDP Sofinov provides venture capital to innovative technology companies with superior growth and performance potential based on leading-edge technologies. Its portfolio consists of investments in companies of all sizes in the life sciences and biotechnology and information and industrial technologies sectors.

The highlights of the year include a large number of initial public offerings (IPOs) and mergers and acquisitions. CDP Sofinov's portfolio has achieved a degree of maturity over the past five years, and the companies in it have often reached a stage where growth is now vital. CDP Sofinov supports its partners in all phases of their growth. This year, it therefore assisted a number of them with technical services or strategic investments.

The Company assisted nine companies with their IPOs:

- H Power Corporation (NASDAQ: HPOW), a designer and marketer of proton exchange membrane fuel cells for the telecommunications sector.
- ART Advanced Research Technologies (TSE: ARA), a company that designs and manufactures a laser-based optical breast-imaging system as well as equipment to detect defects in printed circuit boards.
- Chromos Molecular Systems (TSE: CHR), which designs artificial chromosomes for the treatment of chronic diseases.
- Cryocath Technologies (TSE: CYT), which designs steerable cryoablation catheters permitting minimally invasive surgery.
- Durect Corporation (NASDAQ: DRRX), which designs, manufactures and markets an implant for the controlled long-term delivery of medication.
- Genaisance Pharmaceuticals (NASDAQ: GNOC), which discovers genomic markers that are predictive of drug response.
- Lexicon Genetics (NASDAQ: LEXG), which identifies genes using a proprietary screening technology.
- Neurochem (TSE: NRM), which develops therapeutic molecules used to treat diseases of the nervous system, such as Alzheimer's disease.
- Nexia Biotechnologies (TSE: NXB), which designs transgenic BELE® goats that produce recombinant proteins in their milk.

Moreover, about a dozen companies in CDP Sofinov's portfolio were involved in mergers or acquisitions during the year:

BIOTECHNOLOGY

- Aegera Therapeutics (Montréal, Québec) was created with the merger of Apoptogen and Exogène Neurosciences.
- Anadys Pharmaceuticals (California, United States) was created when Asklipios Pharmaceuticals and Scriptgen Pharmaceuticals merged.
- Baxter International (Illinois, United States) acquired North American Vaccine.
- NTB Neurotrophic Biosciences (Etobicoke, Ontario) announced its merger with IGT Pharma of Vancouver.
- BioChem Pharma (Laval, Québec) announced its merger with Shire Pharmaceuticals Group of the United Kingdom.

INDUSTRIAL TECHNOLOGIES

- Hydrogen Systems N.V. acquired a substantial interest in GL & VH Technologies de l'hydrogène.

INFORMATION TECHNOLOGIES

- Quack.com, a U.S. company, was purchased by America Online (AOL).
- Atrion International merged with Clearcross (Virginia, United States).
- Pyderion Contact Technologies was purchased by Intecom (Texas, United States). The R&D teams will be concentrated in Montréal.
- Locus Dialogue was purchased by InfoSpace (Washington, United States).
- Servicesoft Technologies and Servicesoft Canada merged with Broadbase Software (California, United States).

As at December 31, 2000, the fair value of the Company's portfolio stood at \$1.9 billion and was allocated among 168 companies. The internal rate of return was 67.8% in 2000, and stands at 42.5% over three years.

Biotechnology and life sciences

The portfolio in this sector, with a fair value of \$1 billion, is invested in 77 companies. In 2000, 29 new investments were authorized, including:

- \$2 million in Neurochem, a Saint-Laurent firm that develops therapeutic molecules used to treat diseases of the nervous system, such as Alzheimer's.
- \$7.3 million in Genaissance Pharmaceuticals, a U.S. provider of pharmacogenomic services for the design of personalized medical treatment.
- \$22.2 million in Forward Ventures IV, L.P., a U.S. health and life sciences venture capital fund that invests in biopharmaceuticals and start-ups.

Information technologies

The fair value of this portfolio rose to \$687.6 million, allocated among 65 companies. In 2000, 29 new investments were authorized, including:

- \$6 million in Silanis Technology, a Saint-Laurent company that specializes in the design of electronic signatures and document approval management solutions. Silanis Technology developed Approvelt, the first multi-signature electronic approval management software.
- \$7.5 million in SiGe Microsystems, an Ottawa firm that designs electronic components made of silicon-germanium.
- \$36.5 million in Genesis Partners II LDC, an Israeli venture capital fund that invests in information technology companies.

Industrial technologies

A total of 26 investments are held in this portfolio, which has a fair value of \$207.2 million. The 12 investments authorized in 2000 include:

- \$3.7 million in AstroVision International, a Mississippi supplier of real-time images of the Earth.
- \$4.6 million in Micro Optics Design Corporation, a New Brunswick company that designs precision equipment for automated prescription lens manufacturing.
- \$10.6 million in D.J. Livingston & Co., a New Hampshire firm that designs and manufactures real-time validation systems for manufacturing processes.

T²C²/Bio and T²C²/Info

These two CDP Sofinov satellite limited partnerships have a mission to provide the capital required for start-ups based on technologies developed by universities, public or private research centres as well as the private sector. Investments by the two companies totalled \$17.6 million in 2000.

T²C²/Info invested \$8.1 million in support and start-up assistance for information technology companies. For example, the Company invested \$1.5 million in Avantas Networks, a new company specializing in fibre optics, and \$950,000 in Nomino, a natural language search engine developed at the Université du Québec à Montréal.

The T²C²/Info portfolio is invested in 13 companies, including seven that started up in 2000. Since inception in 1997, T²C²/Info has invested a total of \$15.1 million in the start-up of companies.

T²C²/Bio invested \$9.5 million in the start-up of health science companies in 2000. For example, an investment of \$320,000 was made jointly with the Société Innovatech Québec et Chaudière-Appalaches in the start-up of Altertek Bio, a Québec City company specializing in tissue engineering whose technologies were first developed at Université Laval. The Company also invested \$650,000 in the start-up of Converzime, whose research on enzymes originated at the Clinical Research Institute of Montréal.

The T²C²/Bio portfolio was invested in 27 companies at the end of the year, including 10 that started up in 2000. Since its inception in 1997, T²C²/Bio has invested a total of \$20.5 million in new businesses.

CDP Financial Services

CDP Financial Services acts as a partner to financial services companies, fund managers, mutual fund dealers and fund sales networks, such as independent brokers. In addition to offering financing adapted to their needs, the Company also awards management mandates.

Its mission is to obtain a high return on the assets under management and to increase the volume of funds managed in Québec. It fulfills this mission through agreements designed to strengthen Québec's financial sector and to develop new financial companies. CDP Financial Services acts on three levels: the promotion, management and distribution of funds.

As at December 31, 2000, the fair value of the Company's portfolio stood at \$802 million, versus \$488 million in 1999, an increase of more than 64%. The portfolio includes investments of \$600.8 million in the form of private equity in 43 companies, and mandates of \$193.3 million have been awarded to fund management specialists. The Company's internal rate of return was 13.6% for 2000.

The highlights of the year include the creation of a portfolio managers incubator that will contribute to the development of portfolio expertise, in a project being carried out jointly with the École des Hautes Études Commerciales (HEC), the business school affiliated with the Université de Montréal. Intended for young professionals and recent finance graduates from all Québec universities, as well as financial establishments that want to test new financial models and products, the incubator is an original tool that not only supports and encourages a new generation of managers but also makes it possible to test new management methods in real time without putting capital at risk. The incubator will give rise to new fund management roles and promote the development of financial products in the R&D stage.

CDP Financial Services also made many investments in 2000. These include:

- The conclusion of a partnership agreement with Assurance vie Desjardins-Laurentienne, whereby CDP Financial Services takes a 30% interest in Services financiers La Laurentienne (SFL), one of Québec's largest networks of representatives in life and health insurance, group savings and financial planning.
- \$2.1 million in Coventree Capital Group, a financial services company that specializes in securitization of various financing vehicles.
- The acquisition, in partnership with Nova Bancorp, of SVC O'Donnell, a Canadian mutual fund company.
- A \$2.7-million investment in Groupe BBSP of Paris, the leading European technical analysis adviser on the main G7 interest rate, index and foreign exchange markets. As a result of this new partnership, CDP Financial Services also gave a US\$10-million management mandate to MT Asset Management, a company affiliated with Groupe BBSP that is active in the management of derivatives.
- The acquisition of a 25% interest in Putnam Lovell Group, a leading investment bank focused on the financial services industry, with offices in San Francisco, New York, Los Angeles and London. CDP Financial Services authorized a \$36.8-million investment in Putnam Lovell Equity Partners LP, a Putnam Lovell fund.
- A partnership with Crédit Commercial de France (CCF) led to the creation in Montréal of Myriade, a limited partnership that intends to acquire fund managers in various sectors, so as to gain access to broad expertise and to offer a diversified product line (derivatives, variable-income products, index-linked products, management of foreign funds, etc.). CDP Financial Services and its partner will each invest \$95 million in the transaction.

GEOGRAPHICAL BREAKDOWN OF CDP CAPITAL INTERNATIONAL PORTFOLIO

as at December 31, 2000
fair value – in percentage

■ Latin America	8
■ Middle East and Africa	1
TOTAL	100

CDP Capital International

CDP Capital International invests in Europe, Asia, Middle East, Latin America and United States and contributes to the global expansion of its portfolio companies.

To that end, CDP Capital International has internal and external teams abroad that invest in private investment funds and directly in companies. CDP Capital International also manages private investment funds in various countries in partnership with local teams, which enhances Québec CDP's stature in the international arena.

The Company partners with the best private investment managers on the main foreign markets. It therefore seeks partners with solid expertise who can open doors to the most promising business opportunities.

Since 1999, the portfolio has grown 65% to \$1.5 billion as at December 31, 2000. The number of investments increased from 48 to 69 over the same period. The internal rate of return for 2000 was 23.9%.

CDP Capital International expanded its network of partners this year, especially in Asia. Its main activities in 2000 include:

Asia

- The creation of the CDP Korea Telecom and Infrastructure Fund, in collaboration with CDP Capital Communications, a US\$500-million fund that will invest in the infrastructure and telecommunications sectors in South Korea. The fund will be managed by a firm whose majority share holder is Québec CDP. It has already attracted a number of prestigious South Korean investors, such as the Korean Development Bank, Hanvit Bank, Samsung Life Insurance Company, Kyobo Life Insurance Company and Tong Yang Investment Bank.

- US\$50 million in KorAm Bank, a Korean bank with assets of US\$20 billion. The investment is part of a larger US\$430-million operation involving The Carlyle Group, JP Morgan Corsair, the Singapore government (GSIC), Prudential Asset Management (PAMA) and PPM Ventures.
- US\$35 million, through the Asia Equity Infrastructure Fund, managed by the company, in Hughes Telecom India Limited, a company that operates a fixed network in the State of Maharashtra in India.

Latin America

- Strategic partnership with Violy, Byorum & Partners (VB&P), one of the foremost investment banking and advisory firms in Latin America, and investment of US\$10 million in VB&P Holdings, LLC, which includes the investment and asset management operations of the group. This new partnership will accelerate the growth of VB&P operations and give CDP Capital International the opportunity to consolidate its base in Latin America. Moreover, the portfolio firms that are interested in expanding into Latin America will benefit from this addition to the business network.

CDP Capital International has considerably stepped up its activities in several regions of the world in recent years. The Company also plays a vital role in establishing Québec CDP's network of offices abroad. Finally, CDP Capital International supports portfolio companies in their efforts to expand internationally.

Accès Capital International

In 2000, Accès Capital International completed investments totalling \$12.7 million, notably in GSSLA and Northstar Trade Finance:

- GSSLA is a Latin American subsidiary of Générale de Services Santé N.A. (GSS), a partner of CDP Capital d'Amérique. In Québec, GSS owns and operates eight extended care hospitals and senior citizens residences, in addition to providing health-care and home-maintenance services. GSSLA manages clinics and hospitals in Venezuela and Chile on its own account or for third parties. This investment will enable it to expand in Latin America.
- Northstar Trade Finance provides financing to buyers of exported goods. This investment will serve above all to support our exporters' initiatives more effectively.

Groupe Expordev

Groupe Expordev's prestigious shareholders include Telesystem, Bombardier, Bronterra International Corporation (Claridge), SNC-Lavalin International and the Export Development Corporation (EDC). Its mission is to market value-added products on promising markets through strategic partnerships and networks abroad.

During the year, Expordev set up an attractive export niche in the hotel sector in South America. It concluded an initial transaction of US\$1.0 million in Argentina for the supply of various Québec products to two hotels with a total of 235 rooms.

Close co-operation with Cadim and the Northstar Group will boost this sector of activity significantly in 2001.

CDP Real Estate

CDP Real Estate manages the specialized real estate and mortgage portfolios. A team of specialists develops strategies, monitors returns and oversees the activities of the subsidiaries and the companies responsible for operational management.

In 2000, the CDP Real Estate member companies continued their overall strategy of optimizing returns by taking advantage of the differing business and real estate cycles, by selecting investments on the basis of products and sectorial and geographical markets, and by maximizing arbitrage opportunities between holding properties directly and owning real estate securities. In line with their objective of dynamic management of investments, the companies also systematized their asset turnover strategy, mainly involving the disposition of assets that no longer correspond to their growth objectives.

This year, CDP Real Estate was especially active, performing transactions valued at \$6.8 billion, through many acquisitions, new investments, development projects and sale of assets. The year also saw a large number of construction, reconstruction, renovation and leasehold-improvement projects that added value to the group's assets.

The combined assets of the specialized real estate and mortgage portfolios stood at \$19.1 billion as at December 31, or 15.3% of Québec CDP's total assets under management. By way of comparison, the figures for 1999 were \$15.5 billion and 14.7%.

The specialized real estate portfolio returned 18.3%, significantly outperforming its benchmark, the AON index, which posted 14.4% for the year. Assets rose to \$16.2 billion at year-end, up 19% from 1999. Related bank and mortgage loans, third-party minority interests, and other liabilities totalled \$10.5 billion, versus \$9.5 billion in 1999. The portfolio also generated \$830 million of investment income, compared with \$505 million in 1999.

Finally, the specialized mortgage portfolio returned 12.3%, outperforming its benchmark index, the SCM-Universe, by 210 basis points. The portfolio's assets totalled \$2.9 billion as at December 31, 2000, or 2.3% of total assets under management, up 50% from 1999.

Ivanhoe¹

Ivanhoe manages, develops and invests in retail properties concentrated in urban areas, wholly owned by the Company or held in partnership with other investors. Its subsidiary Cambridge Shopping Centres is a leading owner, manager and developer of regional and super-regional malls in Canada.

In 2000, Ivanhoe carried out a number of major transactions with a total value of \$1.6 billion.

Acquisitions

During the year, Ivanhoe made top-tier acquisitions totalling \$909 million, including:

- The Montréal Eaton Centre, a prestigious shopping mall on Sainte-Catherine Street. The centre attracts more than 22 million people a year and is the highest-performing shopping centre in Québec.
- A 50% interest in Place Laurier, a super-regional mall in Sainte-Foy, a suburb of Québec City. Ivanhoe manages the centre, which is co-owned by OMERS Realty Corporation. Place Laurier is the largest shopping centre in Eastern Canada and attracts 15 million people a year.

Real estate development and capital expenditures

Ivanhoe also carried out a number of projects involving property development and capital expenditures. These initiatives totalled \$174 million and featured:

- Redevelopment of the Eaton's building in downtown Montréal, an investment that will ultimately total \$154 million. The Québec retail leader Les Ailes de la Mode will occupy 21,000 m² from the ground level to the fourth level. Some 70 stores and businesses will share 12,500 m² from the Métro level to the second level. Ivanhoe will develop offices on the upper floors. The work began during the year, and the inauguration is scheduled for the spring of 2002.

- The opening of the first Famous Players Colossus movie theatre complex in Québec, marking the launch of Centropolis Laval, which will be an immense retail and entertainment complex. Centropolis Laval is located in Laval, a Montréal suburb, on 325,150 m² of land. In 2000, certain streets were built, and in the near future building construction will begin. On completion, Centropolis Laval will represent an investment of \$200 million.
- Construction of International Plaza in Tampa, Florida, continued in partnership with Taubman Centers. This high-end mall, which is already more than 80% leased, will be inaugurated in September 2001.

Investments in publicly traded companies

The major transaction of the year was without doubt the acquisition of all the shares of Cambridge Shopping Centres Limited, which owns 39 shopping malls across Canada. This transaction totalling more than \$500 million enabled Ivanhoe to diversify its operations geographically, as well as its risk. The two companies subsequently merged. Ivanhoe Cambridge is one of the largest real estate management, development and investment companies in the country and focuses on high-quality shopping malls in urban settings in Canada and the United States.

Sales and transfers

Sales and transfers in 2000 totalled \$511 million and included:

- Assignment of a 32.45% interest in two malls, Carrefour Laval and Les Promenades Saint-Bruno, to Cadillac Fairview Corporation in exchange for the Eaton Centre.
- The sale of seven shopping centres in Québec: Carrefour Argenteuil (Lachute), Les Galeries de la Chaudière (Sainte-Marie-de-Beauce), Place la Citienne (La Prairie), Place Portobello (Brossard), Place Sorel (Sorel), Place Belvédère (Sherbrooke) and Centre Forest (Montréal-Nord).

¹ The operations referred to exclude the subsidiary Cambridge Shopping Centres.

- The sale of five shopping centres in Ontario: Markham Corners (Scarborough), Victoria Park Square (North York), Bamburgh Gardens (Scarborough), Miracle Plaza (Dundas) and 751 Upper James (Hamilton).
- The sale of a 50% interest in Northumberland Mall (Cobourg, Ontario).
- The transfer of four shopping centres in the United States to a REIT created with the Wilmorite Group and the National Electrical Benefit Fund of the United States. The properties are Charlestowne Mall (Illinois), Danbury Fair Mall (Connecticut), Eastview Mall (New York) and Eastview Commons (New York).

SITQ IMMOBILIER²

SITQ IMMOBILIER specializes in real estate management, development and investment, focusing on office buildings, business parks and small shopping centres. The properties are wholly owned or held in partnership with other investors. Its subsidiary Pen York Properties oversees the management, development and acquisition of office and industrial properties in the Greater Toronto area.

The Company's operations in 2000 totalled \$1.7 billion.

Acquisitions

The acquisitions made by SITQ IMMOBILIER during the year totalled \$1.2 billion. Among the most notable were:

- Five prestigious buildings in downtown Montréal for \$728.1 million: Place Ville-Marie, 700 de la Gauchetière Ouest, 1010 Sherbrooke Ouest, 2020 University and 360 Saint-Jacques Ouest.
- A 50% interest in the Sun Life Building, an architectural landmark in downtown Montréal, for \$65.4 million.

² The operations referred to exclude the subsidiary Bentall Corporation.

- Place Bell, an office building in Ottawa. The transaction involved disbursements of \$165.9 million and is a first for the company on the Ottawa market.
- Purchase of the interest held by a Québec partner in the Bois-Fontaine office building in Québec City, bringing its ownership stake to 65%.
- Acquisition of First National Bank Center in San Diego (California) following the creation of San Diego Equities REIT I. The office building, totalling 52,850 m² on 27 floors, is held jointly with USAA Real Estate Company.

Real estate development and capital expenditures

SITQ IMMOBILIER was very active in projects involving property development and capital expenditures, which totalled \$132.6 million and included the following:

- Agreement with Lucia, a subsidiary of Colony Capital Fund, to acquire 202,000 m² of building rights that include Tour Adria, a 39-story building (59,000 m²) in La Défense (Paris), to be delivered in 2003.
- Construction of phase I of the Chiswick business park in London (England), a \$300-million project involving disbursements of \$25.5 million this year. The Company also increased its interest in Chiswick from 12% to about 20%. This project is being carried out in partnership with Schroders Exempt Property Unit Trust and Equitable Life Insurance Society.
- Continued construction at Castle Quay Shopping Centre in Banbury (England), a project representing an investment of more than \$100 million.
- Continued construction of the Cité du Multimédia complex, in Old Montréal. Two years after the launch, four buildings have been completed for a total of 52,000 m², two others are under construction and should be delivered by the summer of 2001, and additions of 22,300 m² and 50,000 m² are in the planning

REAL ESTATE SECTOR BREAKDOWN

as at December 31, 2000

fair value - in millions of dollars

Subsidiaries	Commercial buildings	Office	Industrial	Residential and hotels	Land	TOTAL

stage. This project is being carried out in partnership with SOLIM (a real estate subsidiary of the Fonds de solidarité des travailleurs du Québec) and the Société de développement de Montréal.

Investments in publicly traded companies and funds

SITQ IMMOBILIER invested \$48 million in the Blackstone and Carlyle Realty Partner funds.

The Company currently aims to take Bentall Corporation private by acquiring all outstanding shares at a cash price of \$20 per share. SITQ IMMOBILIER, which holds about 52% of Bentall stock, has signed irrevocable lock-up agreements with Bintree Holdings Ltd. and ACCESS Foundation concerning all their common shares in response to their offer, representing some 42% of the common shares not held by SITQ IMMOBILIER. This offer ties in with SITQ IMMOBILIER's growth strategy of being a leader in the Canadian real estate market and a reference in the U.S. market.

Sales and transfers

Sales and transfers during the year totalled \$347 million and included:

- The sale by SITQ Europe of 20% of its interest in buildings in Paris to the SPID real estate fund, a subsidiary of France's Caisse des Dépôts et Consignations. This is the first real estate partnership between the Company and that institution. SITQ IMMOBILIER is now managing the buildings for its new partner.
- The sale of the LaFayette office building in the United States.
- The sale of the Siemens industrial building in Mexico.
- The sale of 13 shopping centres in Québec.
- The transfer of Republic Place, an office building in Washington, D.C., to a new U.S. REIT, Washington Real Estate Equities REIT I. The REIT was created jointly with USAA Real Estate Company and enabled SITQ IMMOBILIER to acquire an interest in Sequoia Plaza, a complex of three office buildings in Arlington, Virginia.

Cadim

Cadim manages a portfolio consisting mainly of residential properties and unconventional real estate investments – opportunity products, shares of real estate companies and funds, and investments in new markets – held in partnership with other investors.

During the year, the Company carried out transactions totalling \$2.1 billion.

Acquisition of properties

Cadim's acquisitions totalled \$284 million in 2000 and included:

- Interests in properties in the United States and Canada, with partners Cargill, Ellis and Caber, for a total of \$216 million, specifically Marathon Plaza, a 65,000-m² office building in San Francisco, and a portfolio of 58 industrial buildings in Toronto.
- An interest of nearly 50% in The Heights at Cape Ann (Massachusetts), a residential complex with 276 apartments. The transaction was carried out through Lend Lease Arch Street Fund II, a REIT held in partnership with Lend Lease Real Estate Investments, Cornell University, Fanny Mae and Bank One.
- Sutton Place (Michigan), a 516-unit apartment complex, in partnership with Lend Lease Real Estate Investments, for \$28 million.

Real estate development and capital expenditures

The Company also made capital expenditures of \$31 million, including:

- Construction of a 100-unit condominium in Les Jardins de Mérici, a Québec City residential complex that already comprises eight buildings, in partnership with the Ruel family of Québec City. Cadim will have the option to construct another building on the land.

Investments in publicly traded companies and funds

Cadim invested \$1.0 billion in opportunity products (public companies and investment funds). The highlights are as follows:

- Acquisition of all the shares of Acanthus Real Estate Corporation, a public Canadian company specializing in the residential sector. This new wholly-owned subsidiary gives Cadim a high-quality pan-Canadian portfolio totalling \$480 million. The residential portfolio held by Acanthus comprises 21 real estate complexes, for a total of 4,921 apartments, located in Ontario and Nova Scotia. Acanthus also has a portfolio of six industrial properties (75,350 m²), three office buildings (24,600 m²) and 12 small shopping centres (63,100 m²). The properties are in Ontario, Alberta, British Columbia and New Brunswick.
- Acquisition of a major interest in The Praedium Group, a U.S. company specializing in real estate investments in North America whose investments to date total US\$2 billion. This transaction has enabled Cadim to tap into an extensive network of U.S. investments and investors.

- Investments totalling \$392 million in various opportunity funds, including Lone Star Opportunity Funds II and III, Asian Property Partners and Lazard & Frères.
- Two investments totalling \$52 million in RioCan, the largest REIT in Canada.

Financing

Cadim provided a total of \$58 million in financing in 2000, notably for the following project:

- Panorama sur l'Île, a residential project on Cadim's last parcel of land on Nuns' Island, in suburban Montréal. The developer is LSR Construction.

Cadim also disbursed some \$48 million in the form of mezzanine loans in Canada and the United States. This new product, launched in 1999, is a cross between a conventional loan and a direct investment. The mezzanine loan is relatively rare in Canada. It overlays conventional loans and offers a high loan-to-cost ratio of as much as 90% to 95%. This product thus reduces the equity required for building acquisition, development or construction.

Sales and transfers

A number of sales were effected during the year, for a total of \$686 million. They include:

- The "Foncière de la Cité" portfolio comprising some 40 residential and office buildings in France, mainly in the Paris region.
- Investments in Cypress Lakes, a residential complex with 336 apartments in Boca Raton, Florida, and a commercial property in New York City.
- Interests in the La Laurentienne office complex in Québec City, the CITEC technology park in Saint-Laurent and several parcels of land.

Cadim-FSTQ New Markets Fund

The Cadim-FSTQ New Markets Fund, created in 1998 in partnership with the Fonds de solidarité des travailleurs du Québec, approved several investments this year:

- Financing for the acquisition of land for phase II of the Julianowska residential complex, a 204-unit condominium project near Warsaw, Poland. To date, the fund has invested US\$5.3 million in the project. Five buildings in phase I, with 286 condominiums, were delivered during the year.
- Financing of the construction of a residential complex of 152 apartments and townhouses in Piaseczno, near Warsaw, in partnership with Québec company Indra Internationale. The fund has invested US\$3.6 million in the project.
- Creation, with its Québec partner J.O. Lévesque Ltée, of a vehicle to obtain certification of Québec construction materials in Poland for maximum distribution of such products.
- A new partnership with Grupo Paulo Octavio, a Brazilian company with operations involving hotels, property development, automobiles and management of rental properties (apartments, shopping centres, stores and offices), and real estate assets worth an estimated US\$152 million. The partnership was formed to construct a residential complex in Brasilia. This is the first real estate partnership in Brazil for CDP Real Estate.

CDP Mortgages

CDP Mortgages specializes in assets management held in mortgage loans and securities and financial instruments derived from them.

In 2000, the Company was very active with a record volume of loans. Approved investments totalled \$1.4 billion. Many mortgage loans, in amounts ranging from \$750,000 to \$148 million, were provided to a wide range of partners for different types of buildings. These included:

Québec

- \$3.5 million for Immeubles Gavan SEC (Sainte-Foy)
- \$11 million for Société en commandite Pomerlim (Charlesbourg)
- \$11 million for Les Jardins Dorval (Dorval)
- \$26.5 million for Complexe Saint-Charles (Longueuil)
- \$38.8 million for Place Portobello (Brossard), Place la Cité (La Prairie) and Les Galeries de la Chaudière (Sainte-Marie-de-Beauce)
- \$50 million for Les Rivières shopping centre (Trois-Rivières)
- \$60 million for 630 René-Lévesque (Montréal)

Outside Québec

- \$37.8 million for five loans acquired from a financial institution (Ontario)
- \$40 million for Queen's Quay Terminal (Toronto)
- \$77 million for Crown Life Place (Toronto)
- \$85 million for the Atrium on Bay (Toronto)
- \$148 million for 483 Bay Street (Toronto)

CDP Mortgages also floated two public issues of commercial mortgage-backed securities (CMBS) on the Canadian market. The first issue, with a face value of \$235 million, involved three mortgage loans on Québec malls: Place Sainte-Foy (Sainte-Foy), Mail Champlain (Brossard) and Les Galeries Rive Nord (Repentigny). The transaction received a subordination rate of 27.6%, so the AAA bonds represented 72.4% of the bonds issued. The second issue, with a face value of \$251 million, involved 57 mortgage loans secured by 71 properties (office, industrial and commercial buildings as well as hotels) in Canada (Québec, Ontario, Nova Scotia, New Brunswick and Alberta). The transaction received an excellent subordination rate of 15%, with the AAA bonds representing 85% of the bonds issued.

Finally, CDP Mortgages launched interim financing, a product intended for short-term financing, especially for building construction. This product enables builders to obtain a loan at the outset of a project for about two years, until the building becomes eligible for long-term financing. The product is available throughout Canada and loans totalling more than \$221 million were provided in Québec, Ontario and Alberta.

Management for new clients

There are two components to Québec CDP's operations: under the first, reflecting its traditional operations, it manages the assets of about 20 depositors under a particular act, while under the second, reflecting the expansion the institution has undergone over the past few years, it manages and administers assets for clients.

With its solid fund management expertise, the CDP group now provides management services to a number of clients:

- The Public Curator of Québec, for whom it has managed group funds since 1999.
- The Hungarian pension plans Honved and Aranykorona, which hold the funds of the Hungarian armed forces and the employees of the Ministry of Agriculture, respectively.
- Strategic Nova Mutual Funds, StrategicNova Funds Management for which CDP Global Asset Management manages four funds, the StrategicNova Canadian Dividend Fund, its largest fund, the StrategicNova Latin America Fund and the StrategicNova World Precious Metals Fund. CDP Global Asset Management also manages some of the Top Gun funds.
- Cartier Mutual funds, of the Canadian company Cartier Mutual Funds. Pursuant to a multi-management mandate awarded in 1999, CDP Global Asset Management manages three investment funds: Canadian Equity Fund, Canadian Bond Fund and Foreign Equity Fund.
- The Maestral Mutual Funds, which have been offered to the public by Gestion Placements Desjardins since late October. These 10 different funds are based on the multi-management approach. CDP Global Asset Management is one of the managers of Maestral's Canadian Bond, Asset Allocation and Canadian Equity funds.
- A US\$500-million fund that invests in infrastructure projects in South Korea and is managed jointly by CDP Capital International and CDP Capital Communications.
- Northern Trust Global Advisors has given CDP Global Asset Management a sub-adviser mandate to manage a portion of a large Canadian pension fund.
- The Varan Fund, a hedge fund created under the aegis of an external management partnership with Northern Trust Global Advisors.
- The Asia Equity Infrastructure Fund (AEIF), created by CDP Capital International in conjunction with AMP Life and the Asian Development Bank. Several other partners have since joined, including Nippon Life of Japan, the Belgian venture capital fund GIMV, Perez Companac of Argentina, AXA of France and the Fonds de solidarité des travailleurs du Québec. With initial capital of US\$355 million, AEIF finances Asian infrastructure projects exclusively, focusing on telecommunications, transportation, energy and environment.
- SITQ IMMOBILIER manages buildings in Paris, for the SPID real estate fund of Caisse des Dépôts et Consignations.

Creating opportunities

CDP Advisory Services was created in 1998 to assess and act on new business opportunities. Through advisory services and partnerships with local specialists, the team's role is to set up, manage and administer social support and group savings plans such as pension funds, as well as to manage their reserves effectively. The objective is twofold: to enhance the vitality of local financial markets through sound, rigorous management and to put in place a social safety net through the creation of pension funds.

CDP Advisory Services offers the expertise of Québec CDP and its partner institutions and companies by exporting its model and sharing its experience elsewhere in the world, especially on emerging markets. The services offered range from the transfer of expertise, which may take the form of technical assistance and training for an institution's managers, to asset management, for or in co-operation with a partner.

In the past year, CDP Advisory Services has obtained a number of mandates for Québec CDP:

- Two Hungarian pension plans recently concluded an agreement to have CDP Global Asset Management manage their funds. The assets under management total \$60 million, and the growth outlook is positive, with assets expected to reach \$200 million in 2004.
- An alliance was also formed in Israel. Over the medium term, the Israeli government plans to authorize investment abroad and to promote the development of private pension funds. CDP Global Asset Management could receive a mandate to manage international funds.
- CDP Advisory Services was given a mandate by Algeria's Ministry of Finance to review and document institutional mechanisms and bond market operations in order to compare current processes with best practices. This initiative reflects the government's intention to increase contractual savings and to promote and energize Algeria's financial markets.
- Québec CDP was selected by the Sri Lankan government to assist it with a legislative and regulatory review and the creation of a supervisory and control body for the insurance and pension fund sectors. A project to provide the relevant training and on-site support is being negotiated with Sri Lankan authorities.

- CDP is providing technical assistance to the supplemental pension fund in the Tyrol region of Northern Italy in its efforts to create an institution modelled on Québec CDP.

Collaboration with the CDG of Morocco continued during the year, with training for the institution's managers and the creation of a joint venture capital fund that invests in Morocco's private sector and is managed by CDP.

Finally, CDP Advisory Services continued its business development efforts, especially in the Near East, the Persian Gulf countries and Southeast Asia.

Depositors' accounts management

To constantly improve quality, the Québec CDP team responsible for managing depositors' accounts meets with the depositors on a regular basis to review investment policies and ensure the CDP group can obtain the best possible returns for them while respecting their risk tolerance and taking their individual financial situations into account.

In this context, the team met with each depositor to make a major change to the investment policies. The foreign exchange hedging policy was revised in April to effect a gradual shift from a policy of complete hedging to 50% hedging of the U.S. and foreign equities portfolios by the end of 2001. Following discussions with the depositors, it was decided that depositors would adopt as of January 2001, the TSE 300 capped index, a benchmark where the weighting of the Nortel security is limited to 10%.

Again this year, an independent firm was mandated by Québec CDP to lead a survey in view of evaluating the level of satisfaction of depositors in terms of services received. The institution also continued the re-engineering its administrative processes undertaken in 1999 to accelerate and improve the production of financial information, i.e., analysis of results and detailed allocation of returns, especially the information provided to depositors, which is among the most detailed on the market. The institution's objective is to go beyond industry standards in this area.

To support this initiative, an extranet site was created where all reports prepared for depositors are posted. The site gives depositors faster access to the reports and permits electronic filing and retrieval.

During the year, the team also continued its program of stock market and portfolio management seminars for depositors. A new seminar on derivatives was added to those already available.

A few figures

In 2000, depositors together made net deposits of \$1.8 billion, whereas their assets grew by \$6.7 billion. This growth is attributable to this year's overall return of 6.2%, which yielded \$4.9 billion in net income. This income is some \$1 billion more than it would have been if CDP teams had merely reproduced, without trying to outperform, the benchmark indices for the various asset classes in the overall portfolio.

VALUE ADDED TO DEPOSITORS' HOLDINGS SINCE 1966

in millions of dollars

Depositors made net withdrawals exceeding their net deposits but their net holdings totalled \$88,263 million as at December 31, 2000.

¹ Do not include advances to depositors.

Investment income for the past five years totals \$37.5 billion, recorded in assets on the depositors' balance sheets. During the same period, their net withdrawals exceeded their deposits by \$600 million. Fortunately, this tendency for withdrawals to exceed deposits, which began in 1984, reversed itself slightly in 1999 and continued in a positive direction in 2000.

Pension Plans

The *Government and Public Employees Retirement Plan (RREGOP)* is the largest depositor and includes the contributions made by unionized permanent and casual employees in the public and parapublic sectors while the *Pension plan for Management (PPM)* includes contributions made by management personnel. These plans are administered by the Commission administrative des régimes de retraite et d'assurances (CARRA).

The *Fonds du Régime de rentes du Québec (RRQ)*, the second-largest depositor, provides income security for Québécois, particularly through benefits paid to pensioners. This fund is administered by the Régie des rentes du Québec.

The *Régime supplémentaire de rentes pour les employés de l'industrie de la construction du Québec (CCQ)* oversees the application of collective agreements and laws and regulations governing worker placement, hiring and mobility in the construction industry, as well as the administration of supplemental benefits plan accounts.

The *Fonds d'amortissement des régimes de retraite gouvernementaux (FARRG)* was established to provide the Québec government with the sums necessary to pay its employer contributions to various pension plans.

The *Pension Plan for Elected Municipal Officers* is offered to elected municipal council members and is administered by the Commission administrative des régimes de retraite et d'assurances (CARRA).

The *Régime complémentaire de rentes des techniciens ambulanciers œuvrant au Québec (RRTAQ)*.

Nine other pension plans, called *individual plans* and administered by the Commission administrative des régimes de retraite et d'assurances (CARRA), cover certain contributors working for municipalities, Crown corporations, hospitals and the federal government.

Insurance Plans

The *Commission de la santé et de la sécurité du travail (CSST)* primarily compensates workers who are victims of industrial accidents and facilitates their rehabilitation.

The *Société de l'assurance automobile du Québec (SAAQ)* has a mission to reduce the risks inherent in road use by controlling access to the highway system and road transportation, promoting highway safety and compensating victims of traffic accidents.

The *Régie de l'assurance-dépôts du Québec* governs the solicitation and receiving of deposits from the public, guarantees the deposit of payments and manages the deposit-insurance fund.

The *Régie des assurances agricoles du Québec* contributes to the economic growth of Québec's agricultural sector by covering the income of its enterprises against natural and market risks.

The *Fonds d'assurance-prêts agricoles et forestiers du Québec (FAPAF)* guarantees lenders repayment of losses resulting from loans provided under laws administered by the Société de financement agricole.

The *Fonds d'assurance-garantie*, administered by the Régie des marchés agricoles et alimentaires du Québec (RAAMQ), is an economic regulatory body whose main functions are to promote effective and orderly marketing of agricultural, food and fish products.

The *Fédération des producteurs de bovins du Québec* is an agricultural association that oversees the study of problems associated with cattle production and marketing.

The *Régime de rentes de survivants* pays a monthly pension to the spouse and children of any person eligible under the plan. The plan covers management personnel in the public and parapublic sectors.

Other depositors

The *Office de la protection du consommateur (OPC)* manages the Fonds des cautionnements des agents de voyage and the fund of Protégez-Vous magazine, which publishes the OPC's test results.

The *Centre de recherche industrielle du Québec (CRIQ)* acts as a partner in the commercial, industrial and public sectors to stimulate Québec's economic development.

The *Société des alcools du Québec (SAQ)* is in charge of the sale of alcoholic beverages in Québec.

The *Commission des valeurs mobilières du Québec (CVMQ)* oversees the securities market.

CHANGES IN DEPOSITORS' HOLDINGS

¹ Estimate.

² Previously known as the Government and Public Employees Retirement Plan – contributions from non-unionized level employees.

³ In 1992, the net assets of this plan's fund were merged with that of the Pension Plan for Elected Municipal Officers.

⁴ These depositors solely use the Québec CDP's cash management services.

Administration, Human Resources, Institutional Affairs and Public Affairs

Planning

Planning activities in 2000 focused on the institution's objective of remaining one of the best fund managers in the Americas.

Its various administrative units were therefore called on to specify their action priorities for 2000 and 2001. It is CDP's intention to follow and surpass industry best practice, on an ongoing basis, in all its sectors of activity.

This objective compels the institution to detail its strategies for dealing with the rapid globalization of the fund management industry. Accordingly, it is actively working to constantly improve the products and services that it offers depositors and clients, and to develop the potential of new products and clientele.

Information Systems

Planning undertaken in recent years combined with the many projects carried out to upgrade information systems ensured a smooth Y2K transition. Early in the year, the CDP group began putting in place an architecture plan to meet the objectives set in the various business plans, in particular to:

- Increase assets
- Improve operating efficiency
- Permit faster settlement of operations
- Reinforce processing systems
- Provide operational support to CDP's offices abroad

This architecture plan led to a number of major activities, including:

- Implementation of an integrated derivatives management system
- Creation of an extranet linking CDP to its depositors
- Study for implementation of an order management system for equities
- Implementation of a system to monitor business opportunities for CDP Private Equity
- Constant upgrading of the technology environment and backup systems
- Implementation of support infrastructure for the offices abroad.

Administrative and accounting services

The past year was characterized by various projects to incorporate new functionalities into CDP group's systems and a review of processes to achieve objectives involving optimization of the production of financial information intended for in-house managers as well as depositors and new clients. For example, this work reduced the time required to produce depositors' statements of account to 10 business days after month-end, which enables Québec CDP to meet industry best-practice criteria.

The personnel of several administrative units were mobilized to implement an integrated derivatives management system. This cutting-edge system enables CDP group to rigorously process, record and monitor its vital and increasingly complex operations involving derivatives.

The transactions carried out by the CDP group continued to increase during the year. The number of investments totalled 271,862, up 20% from 1999.

To optimize its own transactions as well as those involving its custodians, Québec CDP began a consolidation exercise to cut costs while ensuring quality control for its inventory of securities and settlement of transactions. The number of securities custodians was reduced from four to two during the year, securities custody mandates were awarded according to two categories: investments in North America and in other continents.

Administrative and accounting services were also closely involved in setting up an administrative structure for new client management. In addition, three new specialized portfolios and three new individual funds were created in 2000. It should be noted that Québec CDP shares its technological and administrative infrastructure with the subsidiaries, which have included CDP Global Asset Management since last June.

Human resources

CDP group performance depends to a great extent on the expertise and professionalism of its teams. The institution sets itself apart from many of its peers with active management of almost all assets, which requires qualified, competent and creative personnel. Moreover, a solid team supports operations, in administration, accounting, portfolio management support, marketing and communications.

Since April 1, 2000, a policy revised and approved by the Resources Committee and the Board of Directors has governed human resources management. The changes made concern mainly the parameters governing sick leave, overtime and bonuses, and are intended to adapt them to the reality of benchmark markets.

As at December 31, 2000, CDP group, including CDP Global Asset Management and the CDP Private Equity subsidiaries, had 440 full-time employees, 194 of them women and 246 men, whose occupations require a high level of expertise in all sectors. The staff includes:

- 307 university graduates, of whom six hold doctorates and 137 Master's degrees.
- 67 employees who hold the Chartered Financial Analyst (CFA) designation and 85 others who are studying to obtain it. CDP has the highest concentration of CFAs in Canada.
- 53 employees with an accounting designation (CA, CGA and CMA). The number of professionals in this area has risen sharply in recent years in response to increasingly sophisticated financial-management needs.

In addition, CDP Real Estate and its subsidiaries have 978 full-time employees.

Given the expertise that its teams must possess, Québec CDP pays special attention to professional development. During the year, 269 people were enrolled in customized training programs, while 130 employees took courses to improve their English and Spanish communication skills.

Internships are also offered to new university graduates in areas such as finance, economics and applied mathematics. The internships are designed to round out their fund-management and investment training, and to help meet succession needs. In 2000, 45 graduates took part in the program. Thirteen subsequently obtained temporary or full-time employment with CDP group.

Finally, along with Montréal brokerage firms, CDP is involved in a program to prepare a new generation of specialists. In 2000, 25 people took part in the program, which has created internships for 216 people to date.

The efforts made in training, professional development and succession meet the need for specialized personnel created by the increasing complexity of the financial markets on which CDP group invests. Traditional requirements are becoming more diversified. For example, private investments call for an increasingly broad range of skills involving business development, customer service and knowledge of industrial sectors, in addition to finance competencies. In the context of global financial markets, CDP must ensure that it has expertise adapted to this reality.

In recent years, the teams have therefore received customized training in such areas as the client-based approach, the Code of Ethics and Professional Conduct, corporate governance, shareholder agreements.

Institutional affairs

Application of Québec CDP's Code of Ethics and Professional Conduct is a priority. The institution ensures that the staff is familiar with the Code and that its subsidiaries devote the necessary attention to it. Once a year, staff members are required to sign a statement of disclosure concerning their personal investments. Moreover, constant reminders of certain portions of the Code are issued.

A manual of policies and guidelines is available on the Intranet site so that all employees can access useful information on the CDP group.

CDP also applies a policy and guidelines on contracts, which state the principles and rules governing the purchase or rental of goods and services requiring a contract. This policy calls for the award of contracts by tender and also specifies limits and exceptions.

Management of the work environment

CDP devotes considerable effort to managing its work environment, primarily because of the growth of staff levels. The institution decided this year to place all its business operations under one roof and announced the construction of a business office in Montréal and the development of the Québec City head office in the Price building.

Montréal business office

In June 2000, CDP officially announced the location selected for its new Montréal business office. The new building will be in the heart of the international district in the block bounded by Saint-Antoine, Viger, Place-du-Palais and Square Victoria. The 67,260 m² building is scheduled to be ready for occupancy by the end of 2002 and will house some 1,500 employees.

Located strategically between the downtown business district on the one hand, and Old Montréal and the Cité du Multimédia on the other, CDP group's office building will make a major contribution to urban development and revitalization of the international district. The area already contains a high concentration of international organizations, including the International Civil Aviation Organization (ICAO) and International Air Transport Association (IATA), as well as the Convention Centre, World Trade Centre, Montréal International and Montréal Exchange.

The decision to place all Montréal activities under one roof aims at increasing the synergies between the various business units.

The growth of assets under management, the addition of new expertise and new clients, and the hiring of new personnel have created the need for additional space and played a determining role in the decision to build new offices.

The new building will be a daring piece of architecture featuring a horizontal structure. Since it will be built above a Ville-Marie Expressway section that has been covered since December 2000, the building has already significantly enhanced the area's urban fabric. It will blend harmoniously into the international district and Old Montréal alike.

The building's various sections will be linked by a glass vein, which will provide natural light to a large portion of the complex. The building's two façades will overlook the main public squares in the international district, namely Square Victoria and the future Place-du-Palais. Thus the building will also link the east-west underground pedestrian network, with direct access to the Square Victoria and Place d'Armes Metro stations.

Québec City head office

Québec CDP selected the Price building, one of Québec City's architectural gems, as the site of its head office, where it will consolidate its activities in the area. Renovations and work to bring the building up to standard will cost an estimated \$5 million and should take eight months, with completion scheduled for the spring of 2001. Personnel will move into the building at that time. CDP subsidiary SITQ IMMOBILIER is acting as project manager.

Placing all the activities in the Québec City region under one roof will maximize the synergies between the various operating units. Almost 100 people work in Québec City for CDP and its subsidiaries CDP Mortgages, CDP Accès Capital, CDP Sofinov and CDP Capital Communications, and they are currently housed in various buildings in Sainte-Foy and Québec City. Eventually, some of the group's satellite companies may also move into the head office.

Offices abroad

In January 2000, a business office was opened in Paris to capitalize on the increasing potential of the European market. The office is the main gateway to operations on the entire Continent, and its staff work closely with all the investment teams in Montréal. The team at the Paris office covers Europe in its entirety and all CDP asset classes, in particular stocks, bonds, private equity and real estate.

CDP group's network already comprises managers posted in Europe at offices in Bilbao (Spain), Brussels (Belgium), Warsaw (Poland) and Budapest (Hungary), as well as in Tel Aviv (Israel). In 2001, CDP plans to open a business office in Tokyo to serve the Asian market and strengthen its international presence.

Communications, public affairs and marketing

In line with its tradition of disseminating information, Québec CDP once again produced various specialized publications, such as the ImmoCaisse and Accès Capital newsletters and the twice-yearly Cycles et Tendances. These publications are available on the Web site at www.cdpcapital.com.

In media relations, the number of press releases was up once again, to 145 at year-end, and the interviews granted almost tripled, which significantly raised the institution's profile in various specialized media. A number of major developments received considerable media coverage, especially the acquisition of Groupe Vidéotron by Quebecor Media, a company formed as a result of a partnership between CDP Capital Communications and Quebecor, and Ivanhoe's acquisition of all the shares of Cambridge Shopping Centres.

The program of regional tours by management continued during the year, with visits to Québec City, Drummondville, Trois-Rivières, Saint-Hyacinthe and the Beauce-Appalaches region. Articles were prepared and published in regional weeklies under the by-lines of the managers of the offices in the CDP Accès Capital network.

A great deal of effort was invested in internal communications in 2000. A daily electronic newspaper has been published since the fall. *Le Scoop* is posted on the Intranet and presents general-interest news in a format that makes for a quick and pleasant read. This new tool enables employees to stay up-to-the-minute with the latest events. In addition, an internal communications committee of representatives drawn from CDP's main sectors of activity was created to ensure that all needs in this area are met.

Québec CDP also renewed its commitment to finance students, especially through involvement in many university events. The institution supported the 13th Jeux du Commerce, the Québec Youth Summit, and stock market simulations organized by

Université Laval and the Université du Québec à Trois-Rivières.

The institution also promoted itself by taking part in various events held throughout the world, notably in Paris, the Near East, the Middle East and California. In light of the increasing number of foreign delegations that want to visit, it is clear that the institution's profile is rising throughout the world. In 2000, six delegations – from Malaysia, the Philippines, Morocco, Korea, France and the United States – came to Montréal to meet CDP managers and executives.

The number of forums and events in which representatives took part continued to increase. Speakers were invited to share their vision of business and financial issues with such organizations as the Canadian Club of Montréal, the Conseil du Patronat du Québec, Sommet Capital 2000, Entretiens Jacques-Cartier, Alliance Canada-Hong Kong and the Board of Trade of Metropolitan Montreal.

Many activities were held to support the business development efforts of the CDP Private Equity subsidiaries. Three meetings were organized for CDP Financial Services, CDP Capital Communications and CDP Capital d'Amérique partners. A CDP Financial Services representative once again delivered a speech at a meeting held for the business community. As well, several sponsorships were provided, for events such as Bio-Contact, Objectif Entrepreneurship, Le Gala des 500, Bourse Rideau, Bio 2000 and Montréal, plaque tournante de la biotechnologie.

Moreover, for the first time in its history, Québec CDP developed a print media and television advertising campaign. Using the slogan *Investing more than money*, the campaign promoted CDP's financial commitment to Québec companies, whether they are SMEs or world-class corporations. Testimonials by various businesses were featured, notably *My Virtual Model*, Mechtronix Systems, Alimentation Couche-Tard, Portes Baillargeon, Neurochem and Ronor Innovations.

Finally, Québec CDP took part once again in the Québec City and Montréal Savings and Investments Marketplaces and presented the Relève financière award.

Corporate Governance

Amendments to the Corporate Governance By-law

The government approved amendments to Québec CDP's Corporate Governance By-law in 2000. The main amendments are intended to achieve the following:

- To modernize rules governing the Board of Directors;
- To complete the types of specialized portfolios that can be created so as to permit the creation of portfolios that contain investment classes not previously specified, such as specialized portfolios of currencies, diversified products, derivatives, etc.;
- To ensure that participation deposits can be received for all funds each month, and to broaden the conditions for remuneration paid on term deposits and demand deposits so that such remuneration can be determined on the basis of not only the money market but also markets such as stocks and bonds.

Board of Directors

The Board of Directors consists of Québec CDP's CEO, who is the Chairman, depositors' representatives, namely as at December 31, 2000, the President and General Manager of the Régie des rentes du Québec, the Chairman of the Commission administrative des régimes de retraite et d'assurances, and the Chairman and Chief Executive Officer of the Société de l'assurance automobile du Québec, as well as members of the business community and the co-operative sector and labour union leaders.

The Board's role is to ensure that the Québec CDP is managed in accordance with the provisions of its incorporating act and by-laws. It also sees that the institution takes the measures required to achieve the objectives stated in its mission: to achieve an optimal financial return, to contribute to economic growth and to preserve the capital under management.

The Board reviews and approves the main policies and strategic orientations, such as the investment program for the year. It also conducts an annual review of the sectors of activity and receives reports from various committees and ad-hoc working groups when it must consider specific matters.

It is also informed of any transaction, decision, investment or other matter that requires special attention because of its intrinsic importance or its impact on the portfolio or on the asset allocation or for any other reason.

The Board of Directors delegates the review of specific matters to committees made up of CDP Board members. In view of the rapid development the institution has experienced over the past five years, its increasingly important international role, its objective of achieving recognition as a foremost and expanding fund manager active on all organized markets and a private equity leader, the Board of Directors approved the creation of the Resources Committee – Senior Management. One of this committee's functions is to review the process used to appoint members of CDP's senior management.

The Board also delegates to the subsidiaries' boards of directors certain powers to make private investments in the different sectors of activity for which the subsidiaries were created, in line with their missions.

The Board of Directors met 15 times during the year. It worked actively on implementation of measures to give effect to the strategic orientations and priorities adopted for the years to come. It also reviewed certain sectors of activity, as well as the business plans of the CDP Private Equity and CDP Real Estate subsidiaries, and approved the new structure for delegation of authority. It also devoted special attention to matters involving Vidéotron and Cambridge, and approved construction of the new business office in Montréal.

Audit Committee

The Audit Committee examines the annual and quarterly financial statements and recommends their approval to the Board of Directors. It also evaluates the mandate and the nature of the audit work performed and monitors the effectiveness of the internal control systems and mechanisms. The Audit Committee met four times during the year.

Resources Committee – Senior Management

The Resources Committee – Senior Management examines the process used to appoint members of Québec CDP's senior management, defines their respective responsibilities and ensures the succession plan is appropriate. The committee also receives proposals, submits opinions and makes recommendations to the Board of Directors regarding the senior management organizational chart, and the selection and hiring of any member of senior management. For the position of Chairman and Chief Executive Officer, it makes its recommendations to the Québec government. The committee met once during the year.

Resources Committee

The Resources Committee receives proposals, submits its opinions and makes recommendations to the Board to Directors regarding human, financial and computer resources. More specifically, it studies the remuneration policy and the operating and capital budgets. The Resources Committee held six meetings during the year.

Real Estate Portfolio Management Committee

The Real Estate Portfolio Management Committee (the CDP Real Estate Board of Directors) studies the annual strategic plan, receives management reports and approves or recommends certain investment proposals to CDP's Board of Directors. The CDP Real Estate Board met 12 times during the year.

Ethics, Professional Conduct and Corporate Governance Committee

The Ethics, Professional Conduct and Corporate Governance Committee studies reports on the application of the Code of Ethics and Professional Conduct and on the exercise of Québec CDP's voting rights. It provides opinions on any matter covered by the Code or pertaining to its application, as required. It also ensures that the Corporate Governance Policy is updated. The Committee met once in 2000.

Investment Committees

Apart from the Committees of the Board, Québec CDP has eight investment committees and sub-committees.

- The main mandate of the Investment Steering Committee is to review the general investment policy as well as the specific policies arising therefrom, including sectorial policies, and to monitor depositors' investment policies, overall risk management and performance analysis. It also provides opinions and makes recommendations as required, as well as overseeing the activities of the team responsible for management of depositors' accounts.
- The Integrated Risk Management Committee, a sub-committee of the Investment Steering Committee, has met once a month since it was created in 2000. It proposes strategic risk management orientations and policies for the entire CDP group, recommends priority work plans to assign resources to the most important risk elements, harmonizes the methods, systems and models used to identify and analyze risk,

reviews the structure for delegation of authority and the approval limits and monitors risk to ensure it is managed properly. The Integrated Risk Management Committee reports to the Audit Committee.

- The Equity Management, Interest Rate Management and Currency Management committees propose sectorial investment policies, approve management methods and oversee investment operations for their respective sectors.
- The Asset Allocation Active Management Committee performs tactical and strategic management of fund allocation and investment positions among the major asset classes.
- The CDP Real Estate Committee and the CDP Private Equity Committee have a mandate to propose sector-based investment policies, ensure client satisfaction and quality of service, determine strategic orientations suited to Québec's economy and ensure a flow of information among all the components of the CDP group.

Investment Committees

Investment Committees are under the responsibility of the CDP Private Equity subsidiaries. The Committees' main mandate is to:

- Analyze and approve or recommend, as the case may be, investment proposals for their respective sectors;
- Analyze and recommend the business plan for their respective sectors, monitor it and co-ordinate their activities;
- Make any other recommendation to the boards;
- Report to the boards of directors of the subsidiaries concerned by the Committees.

The Investment Committees are:

- Asia Investment Committee
- Europe Investment Committee
- Latin America Investment Committee
- Corporate Debt Investment Committee
- Equity and Quasi-equity Investment Committee
- Accès Capital Recreation and Tourism Investment Committee
- InnovAccès Investment Committee
- Startup capital – Imprésario Investment Committee
- Accès Capital International Investment Committee
- CDP Accès Capital network Investment Committees

Compliance with the highest standards

Québec CDP's operations comply with the requirements of the *Act respecting the Caisse de dépôt et placement du Québec* and industry practice. Its financial statements are prepared in accordance with generally accepted accounting principles, and the calculation of returns meets the requirements of the *Association for Investment Management and Research* (AIMR).

The Auditor General of Québec audits the financial statements and ensures that the institution's operations comply with the Act. Aon Consulting has certified that the presentation of results and calculation of returns meet the high standards established by the AIMR. A firm of outside consultants has given its opinion on the design, effective operation and ongoing application of control procedures within the organization which provides the majority of computer services to Québec CDP.

The market values given for investments are determined using valuation methods used in capital markets, such as the annualization of future cash flows at the current interest rate and the closing prices of the major stock exchanges as well as those provided by recognized brokerage firms. For private investments, the values are assessed annually by outside corporations or through a process of detailed analysis independent of management.

Québec CDP has designated Corporate Secretary, Ginette Depelteau, as the person responsible for receiving and analyzing complaints from clients and the public and devoting the necessary attention to them.

REPORT OF MANAGEMENT

The financial statements of the Caisse de dépôt et placement du Québec were prepared by management, which is responsible for their preparation and presentation, including estimates and material judgements. This responsibility includes selecting the appropriate accounting policies in accordance with generally accepted accounting principles in Canada. Management is also responsible for the information and declarations disclosed in other sections of the Operations report, and ensures that the financial information presented elsewhere in this annual report is consistent with that shown in the financial statements.

Management maintains systems of internal accounting controls which are designed to provide reasonable assurance that assets are safeguarded and that transactions are recorded in an appropriate and timely manner, that they are duly authorized and allow for the preparation of reliable financial statements. The internal audit team reviews the internal controls on a regular basis to ensure they are adequate and applied consistently by the Caisse.

The Caisse is aware of its responsibility to manage its operations in accordance with the rules and regulations that govern the institution.

The Board of Directors supervises the manner in which management assumes its responsibility regarding financial information, and it has approved the financial statements. The Board of Directors is assisted by the Audit Committee, of which only one member is also an officer of the Caisse. The Audit Committee meets with management and the auditor, examines the financial statements and recommends their approval by the Board of Directors.

The financial statements of the Caisse are audited by the Auditor General of Québec, who conducted his audit in accordance with generally accepted auditing standards in Canada. The auditor's report covers the nature and scope of the audit and expresses the auditor's opinion on the financial statements. The Auditor General has unrestricted access to the Audit Committee to discuss any matter relating to his audit.

Jean-Claude Scraire
Chairman of the Board and Chief Executive Officer

Bertrand Lauzon
Executive Vice-President, Finance and Information Technologies

Montréal, February 22, 2001

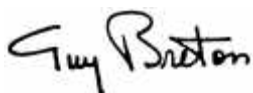

AUDITOR'S REPORT

To the National Assembly

I have audited the combined statement of net assets of the Funds of the Caisse de dépôt et placement du Québec as at December 31, 2000, the combined statement of income, and the combined statement of changes in net assets for the year then ended. These financial statements are the responsibility of the Caisse's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with generally accepted auditing standards in Canada. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In my opinion, these combined financial statements present fairly, in all material respects, the financial position of these Funds as at December 31, 2000 and the results of their operations and the changes in their net assets for the year then ended in accordance with generally accepted accounting principles in Canada. As required by the *Auditor General Act* (R.S.Q., chapter V-5.01), I report that, in my opinion, these principles have been applied on a basis consistent with that of the preceding year.

Guy Breton, FCA
Auditor General of Québec
Québec City, February 22, 2001

**NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2000**

1 CONSTITUTION AND OPERATIONS

The Caisse de dépôt et placement du Québec is a legal person within the meaning of the Civil Code, created by a special act (R.S.Q., chapter C-2). It receives funds, the deposit of which is provided for under a particular act.

GENERAL FUND

The General Fund is comprised of diversified investments and is a pooled fund for demand, term and participation deposits. The General Fund's net equity and net income as at December 31 were shared among participation deposit holders as follows:

	2000		1999	
	Number of units	%	Number of units	%
Régie des rentes du Québec

* For the administration of survivor benefits for the management personnel of the government and public sector, under the responsibility of the secretariat of the Conseil du Trésor.

INDIVIDUAL FUNDS

The Individual Funds are comprised of diversified investments and each have only one depositor who exclusively makes participation deposits therein. The various Individual Funds are:

Fund 301

For the Government and Public Employees Retirement Plan administered by the Commission administrative des régimes de retraite et d'assurances.

Fund 302

For the future Pension Plan for Management administered by the Commission administrative des régimes de retraite et d'assurances (previously known as the Government and Public Employees Retirement Plan – contributions from non-unionized level employees).

Fund 303

For the Individual Plans administered by the Commission administrative des régimes de retraite et d'assurances.

Fund 305

For the Pension Plan for Elected Municipal Officers administered by the Commission administrative des régimes de retraite et d'assurances.

Fund 306

For the Régime complémentaire de rentes des techniciens ambulanciers œuvrant au Québec.

Fund 307

For the Société de l'assurance automobile du Québec.

Fund 311

For the Supplemental Pension Plan for Employees of the Québec Construction Industry - general account - administered by the Commission de la construction du Québec.

Fund 312

For the Supplemental Pension Plan for Employees of the Québec Construction Industry - retirees account - administered by the Commission de la construction du Québec.

Fund 313

For the Supplemental Pension Plan for Employees of the Québec Construction Industry - supplementary account - administered by the Commission de la construction du Québec.

Fonds 314

For the Régie de l'assurance-dépôts du Québec.

Fonds 315

For the Fonds d'assurance-prêts agricoles et forestiers administered by the Société de financement agricole du Québec.

Fonds 316

For the Fonds d'amortissement du régime de retraite – RREGOP administered by the ministère des Finances du Québec.

Fonds 317

For the Fonds d'amortissement of the future Pension Plan for Management– PPM administered by the ministère des Finances du Québec.

Fonds 318

For the Fonds d'amortissement des autres régimes de retraite administered by the ministère des Finances du Québec.

Fund 330

For the Commission de la santé et de la sécurité du travail.

SPECIALIZED PORTFOLIOS

The specialized portfolios are pooled funds for participation deposits of the various Funds. The specialized portfolios are the following :

- Bonds
- Québec International bonds
- Canadian equities
- Diversified, strategic and tactical investments (created November 1, 2000)
- U.S. equities – hedged
- U.S. equities – unhedged (created April 1, 2000)
- Emerging markets equities
- Foreign equities - hedged
- Foreign equities - unhedged (created April 1, 2000)
- Mortgages
- Real estate investments
- Short-term investments
- Canadam short-term investments

2 ACCOUNTING POLICIES

The combined financial statements of the Caisse have been prepared by management in accordance with generally accepted accounting principles in Canada. These statements include amounts based on best judgement and estimates.

a) COMBINED FINANCIAL STATEMENTS

The combined financial statements comprise the accounts of the Caisse's subsidiaries, those of the General Fund and the Individual Funds, as well as those of the specialized portfolios. The accounts of each of these Funds and of each of these portfolios are reflected in separate financial statements audited by the Auditor General of Québec.

b) INVESTMENTS AND JOINT OPERATIONS

Investments and joint operations are recorded as at the commitment date, except transactions involving mortgages and real estate holdings, which are recorded as at the date of agreement.

Investments and related assets and liabilities are accounted for at fair value, which is the estimated exchange value which would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act, established at year-end. Such values are determined using valuation methods used in capital markets, such as the annualization of future cash flows at the current interest rate and the closing prices of the major stock exchanges as well as those provided by recognized brokerage firms. In addition, valuations are made by independent valuers while others are made in-house based on commonly used valuation methods.

Transactions by way of commitments related to short selling of securities result in the acquisition of securities under reverse repurchase agreements or in transactions on loans on securities.

The Caisse subsidiaries provide administrative and management services related to property on behalf of clients. These are not recorded in the Caisse's combined statement of net assets. The Caisse subsidiaries are paid administrative and management fees for such portfolio management and administrative services, which include the management of real estate properties and securitized loans.

c) INCOME

Income from derivative financial instruments is included in the income from the underlying investments.

Income on bonds and short-term investments includes income derived from securities acquired under reverse repurchase agreements reduced by interest expenses on deposits on loans of securities.

Dividend income is recognized on the ex-dividend date. Income from loans of shares and convertible securities is presented under Investment income – shares and convertible securities.

Income from real estate holdings is reduced by interest on loans, notes payable and mortgage loans payable.

d) GAINS AND LOSSES ON SALE OF INVESTMENTS

The gains and losses on the sale of investments are calculated using the unamortized cost in the case of bonds, mortgages and short-term investments, and the cost in the case of shares and convertible securities and of real estate holdings. The unamortized cost represents the acquisition cost restated to take into account the amortization of the premium and the discount that allows the investment to maintain a constant real return until maturity.

Gains and losses derived from derivative financial instruments are combined with gains and losses from underlying investments.

e) FOREIGN CURRENCY TRANSLATION

The fair value of investments and any other assets and liabilities denominated in foreign currencies is translated into Canadian dollars at the rate of exchange prevailing at year-end.

The cost of investments in shares and that of real estate holdings from integrated foreign operations and the unamortized cost of investments in bonds, mortgages and short-term investments are translated at the rate prevailing on the acquisition date. The cost of investments from self-sustaining foreign operations is translated at the rate prevailing at year-end

Income is translated at the rate of exchange prevailing on the transaction date, except income from the specialized real estate investments portfolio, which is translated at the average rate for the year. Gains and losses from derivative financial foreign exchange risk hedging instruments related to investments denominated in foreign currencies are deferred and accounted for in gains and losses on the sale of investments, upon realization of the hedged investments

f) **FIXED ASSETS**

Costs related to the acquisition of telephone, computer and office automation equipment are capitalized and amortized over the useful life of each asset. Set-up costs for the premises and other leasehold improvement costs are amortized over the term of the lease. Costs related to the acquisition of the land and to the building in construction are capitalized. These fixed assets are presented under the item Other assets.

g) **INVESTMENT MANAGEMENT EXPENSES AND ADMINISTRATIVE EXPENSES**

Investment management expenses cover all expenses related directly to investment operations, including expenses paid to external financial institutions. These expenses are presented under a specific item, and are deducted from investment income. General administrative expenses are presented under the item Administrative expenses.

3 INVESTMENTS AND LIABILITIES

Investments and liabilities whose cost differs from fair value are as follows:

	2000 (in millions of dollars)			Cost Total
	Fair value			
	Canadian	Foreign	Total	
ASSETS				
Investments				
Bonds	35,056	5,279	40,335	38,772

Mortgage loans payable	2,835	2,587	5,422	5,405
Derivative financial instruments	52	1,414	1,466	148
Non-controlling interests	672	107	779	600
ASSETS				
Investments				
Bonds	28,690	3,662	32,352	32,133
Shares and convertible securities	22,780	21,459	44,239	31,260
Mortgages	1,685	190	1,875	1,890
Real estate holdings	7,376	4,490	11,866	12,091
Short-term investments	4,605	420	5,025	5,071
Securities acquired under reverse repurchase agreements	116	1,293	1,409	1,441
	65,252	31,514	96,766	83,886
Derivative financial instruments	1,139	675	1,814	81
	66,391	32,189	98,580	83,967
LIABILITIES				
Deposits on loans of securities	2,682	1,857	4,539	4,568
Loans and notes payable	997	32	1,029	1,032
Commitments related to short selling of securities	3,741	1,122	4,863	4,344
Mortgage loans payable	2,433	2,597	5,030	5,074
Derivative financial instruments	1,114	455	1,569	81
Non-controlling interests	1,138	53	1,191	1,074

The foreign exchange position for investments in foreign securities, other than those in emerging market securities or those hedged by a corresponding financial liability, is hedged by derivative financial instruments as shown in note 6.

The cost of investments was reduced by \$18 millions as at December 31, 2000 (increased by \$211 million in 1999), which represents the amount of the gains (losses) carried over to derivative financial foreign exchange risk hedging instruments.

The fair value of bonds and shares and convertible securities as well as short-term investments includes certain investments in private companies, in the amount of \$1,129 million, \$8,719 million and \$1,263 million respectively as at December 31, 2000 (\$1,855 million for bonds and \$4,984 million for shares and convertibles securities in 1999), for which market prices are not available. The fair value of these securities is established based on commonly used valuation methods.

4 DEPOSITORS' HOLDINGS

Demand and term deposits bear interest and constitute the Caisse's indebtedness toward the depositors.

Participation deposits are expressed in units and each unit gives its holder a proportionate share in the net equity and net income of a particular Fund. At the end of each monthly period for the General Fund and the Individual Funds, the net investment income and gains and losses on the sale of investments are distributed to participation deposit holders. At the beginning of the following period, the amounts distributed are paid out to (recovered from) the depositors' demand deposit accounts.

	2000	1999
	(in millions of dollars)	
Indebtedness toward depositors		
Demand deposits	79	45
Term deposits	22	100
Interest on demand and term deposits	(2)	4
Net income to be paid out to participation deposit holders	550	1,195
	649	1,344
Participation deposit holders' holdings		
Participation deposits		
Balance, beginning of year	62,203	55,716
Units issued	17,086	5,955
Units cancelled	(5,487)	(444)
Units to be issued	-	976
Balance, end of year	73,802	62,203
Amount not allocated with respect to real estate holdings*	79	89
Unrealized increase (decrease) in value allocated following interfund transactions	(113)	(32)
Amount not allocated following gains and losses on the sale of investments in the specialized portfolios**	7,074	5,374
Unrealized increase (decrease) in value of investments and other related assets and liabilities	6,772	12,565
	87,614	80,199
DEPOSITORS' HOLDINGS	88,263	81,543

* Represents the restated amount of accumulated amortization of real estate properties resulting from the recording of investments at fair value. This amount will be allocated upon the sale of the properties.

** Represents the gains and losses on the sale of investments in the specialized portfolios which are not distributed at year-end. This amount will be allocated upon the sale of participation units in portfolios.

Shares and convertible securities	66	53
Mortgages	5	4
Real estate holdings	22	18
Short-term investments	1	2
	114	95

6 DERIVATIVE FINANCIAL INSTRUMENTS

Pursuant to its investment operations management, the Caisse conducts transactions involving various derivative financial instruments either to hedge against the risks associated with fluctuations in exchange rates or to manage risks associated with interest rate and market fluctuations. As at December 31, these instruments, the favourable fair value of which is grouped with that of the underlying investments while the unfavourable fair value is recorded in liabilities, including amounts payable on these instruments, under the item Derivative financial instruments, were as follows:

	2000		1999

* Where hedging transactions imply simultaneous use of the US currency and other foreign currencies, the notional amount recorded herein represents the final value expressed in Canadian dollars.

Foreign exchange risks associated with investments denominated in foreign currency and other related assets and liabilities are hedged using derivative financial instruments. In the case of bonds, mortgages, real estate investments and short-term investments, these derivative financial instruments are representative of the value of the investments and the currency in which they are expressed. In the case of foreign equities, the portfolio weighting by country is comparable to the major international indices, and the value of derivative financial instruments is representative of the relative weight of the countries whose securities make up such indices. These instruments are negotiated with banks. Terms generally range from one to three months in the case of forward exchange contracts and options, and from one to two years in the case of foreign currency swaps. Upon maturity, new derivative financial instruments are negotiated to maintain an effective long-term hedge against the exchange risk associated with foreign investments.

Moreover, futures and options traded on stock exchanges, forward exchange contracts, equity index forwards, forward rate agreements, currency and interest rate swaps and options negotiated with banks and brokerage firms, are used to manage the interest rate and market risks of the total investment portfolio in addition to generating income from negotiation activities.

These transactions are negotiated with financial institutions whose credit rating is established by a recognized credit rating agency and operational limits are duly approved by management, which supports compensation agreements in order to limit credit risk.

7 NET COLLATERALS

In the normal course of business, the Caisse has pledged and received securities and other assets as collateral, for a net amount of \$3,736 million (\$3,619 million in 1999) in pledged assets.

8 COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform with the presentation used in the current year.

¹ The notional amount represents the exchange value used for the evaluation of future cash flows in the case of investments and certain assets and liabilities with a determined maturity date; in the case of derivative financial instruments, the notional amount represents the value of the notional principal, to which a rate or a price is applied to determine the exchange of future cash flows.

² Certain investment categories are reported at unamortized cost.

4 ANNUAL INTEREST OR INCOME PAID OUT ON AVERAGE DEPOSITS
(rate in percentage)

CATEGORIES OF DEPOSITS	2000	1999	1998	1997	1996	1995	1994	1993	1992	1991
Demand deposits ¹	5.35	4.48	5.15	3.20	4.74	7.23	2.64	4.85	6.72	9.08
Term deposits ¹	5.83	5.57	5.35	3.73	5.24	6.96	6.07	5.02	6.00	9.03
Participation deposits ²	12.04	8.73	8.38	6.88	11.85	8.99	6.83	9.92	7.55	10.00

¹ The General Fund receives demand and term deposits from depositors and pays out interest on these deposits. The rate indicated is the average rate paid out during the year.

² Income earned on the investments of the Caisse's General Fund and Individual Funds is paid out or allocated to participation deposit holders. The rate indicated is the average annual rate. The rate represents only the income accounted for during the year on depositors' investments. It does not account for the change in the fair value of investments. For purposes of this calculation, participation deposits are computed at cost. The rate is different from the time-weighted rate of return which includes both income and changes in the fair value of investments.

¹ Company in which the Caisse is considered an insider within the meaning of applicable Canadian Securities laws.

² Company in which the Caisse is considered an insider only within the meaning of applicable American laws.

In this table are listed the major investments in share and bonds of public corporations. This table does not account for the hedging of foreign exchange risks. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of the Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, a transaction or series of transactions in process or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of the Caisse, at December 31. However, whenever possible and without transgressing the above standards, the annual list states the total amount of these differences.

INVESTMENTS IN SHARES AND BONDS OF PRIVATELY HELD COMPANIES (continued)

as at December 31, 2000

(fair value - in millions of dollars)

CORPORATIONS	Designation	Units	Shares	Convertible securities	Bonds	Investment amounts
Difference between investments reflected in the annual list and those on the record at the Caisse: 17 debentures convertible files privately held company shares.						

¹ Insider

² Investment made or held by the Caisse or one of its subsidiaries pursuant to the first four paragraphs of subsection 37.1 of the Act Respecting the Caisse .

³ Investment made or held by the Caisse or one of its subsidiaries pursuant to the last paragraph of subsection 37.1 of the Act Respecting the Caisse .

In this table are listed the major investments in shares and bonds of private corporations. This table does not account for the hedging of foreign exchange risks. This table is subject to the disclosure standards applicable to the annual list of such investments.

The annual list must not provide any information deemed to be detrimental to the operations of the Caisse, to its economic interests or competitiveness or which may reveal an intended transaction, a transaction or series of transactions in process or which may cause prejudice to a company. Consequently, there may occasionally exist differences between the investments in the annual list and those recorded in the books of the Caisse, at December 31. However, whenever possible and without transgressing the above standards, the annual list states the total amount of these differences.

Pursuant to agreement, the specific value of investments in any private company (according to the definition of the Québec Securities Act) does not appear in this list unless the company has agreed to such disclosure.

Board of directors *The Board of Directors consists of the Chief Executive Officer of CDP Capital, who is the Chairman, depositors' representatives, namely as at December 31, 2000, the President and General Manager of Régie des rentes du Québec, the Chairman of the Commission administrative des régimes de retraite et d'assurances, the Chairman and Chief Executive Officer of the Société de l'assurance automobile du Québec, as well as members of the business community and the co-operative sector and labour union leaders.*

¹ **Audit Committee** *The Audit Committee examines the annual and quarterly financial statements and recommends their approval to the Board of Directors. It also evaluates the mandate and the nature of the audit work performed and monitors the effectiveness of the internal-control systems and mechanisms.*

² **Resources Committee** *The Resources Committee receives proposals, submits its opinions and makes recommendations to the Board of Directors regarding human, financial and computer resources. More specifically, it studies the remuneration policy and the operating and capital budgets.*

³ **Resources Committee – Senior Management** *The Resources Committee – Senior Management examines the process used to appoint members of CDP's senior management, defines their respective responsibilities and ensures the succession plan is appropriate. The committee also receives proposals, submits opinions and makes recommendations to the Board of Directors regarding the senior management organization chart, and the selection and hiring of any member of senior management. For the position of Chairman and Chief Executive Officer, it makes its recommendations to the Québec government.*

⁴ **Real Estate Portfolio Management Committee** *The Real Estate Portfolio Management Committee (the CDP Real Estate Board of Directors) studies the annual strategic plan, receives management reports and approves or recommends certain investment proposals to the CDP's Board of Directors.*

⁵ **Ethics, Professional Conduct and Corporate Governance Committee** *The Ethics, Professional Conduct and Corporate Governance Committee studies reports on the application of the Code of Ethics and Professional Conduct and on the exercise of the CDP's voting rights. It provides opinions on any matter covered by the Code or pertaining to its application, as required. It also ensures that the Corporate Governance Policy is updated.*

Investment Committees *CDP has eight investment committees and sub-committees. The main mandate of the Investment Steering Committee is to review general investment policy as well as specific policies arising therefrom, including sectorial policies, monitoring of depositors' investment policies, and general risk management as well as performance analysis. It also provides opinions and makes recommendations as required, as well as overseeing the activities of the team responsible for management of depositor accounts. The Integrated Risk Management Committee, sub-committee of the Investment Steering Committee, proposes strategic risk management orientations and policies for the entire CDP group, recommends priority work plans to assign resources to the most important risk elements, harmonizes the methods, systems and models used to identify and analyze risk, reviews the structure for delegation of authority and the approval limits and monitors risk to ensure it is managed properly. As for the Equity Management, Interest Rate Management and Currency Management Committees, they propose sector-based investment policies, approve management methods and oversee the investment activities of their sectors. The Asset Allocation Active Management Committee provides tactical and strategic management of fund allocation and investment positions among the major asset categories. The CDP Real Estate Committee and the CDP Private Equity Committee have a mandate to propose sector-based investment policies, ensure client satisfaction and quality of service, determine strategic orientations suited to Québec's economy and ensure a flow of information among all the components of the CDP group.*

⁶ *Ex officio chairman of the Board of Directors of CDP Private Equity subsidiaries.*

⁷ *Ex officio chairman of the Board of Directors of CDP Real Estate subsidiaries.*

⁸ *Member of the Steering Committee.*

⁹ *Fernand Perreault, Ex officio chairman of the Board of Directors of CDP Real Estate subsidiaries.*

GLOSSARY

Active management

Management style that involves building a portfolio with a weighting different from the index. The objective is to outperform a market or a benchmark index.

Administered asset

Asset with respect to which Québec CDP subsidiaries provide administrative services on behalf of client-owners. These services include administration of real estate property and management of securitized loans. The subsidiaries charge administration fees for these services. Administered asset is not included in the statement of cumulative net assets.

Asset under management

Asset managed by the subsidiaries on behalf of client-owners. Management services, which are more comprehensive than mere administrative services, include selection of investments and provision of advice. The subsidiaries charge administration fees for these services. Asset under management is not included in the statement of cumulative net assets.

Authorized investment

An investment in a more or less long-term project that the Québec CDP has decided to undertake but for which it has not yet made any disbursements.

Business cycle

More or less regular fluctuations in business conditions over a period of time. The five phases of the cycle are expansion, peak, recession, trough and recovery.

CMBS

Commercial mortgage-backed securities, in this instance, sequential-payment bonds secured by a mortgage on a group of commercial mortgage loans.

Cost

Amount paid to acquire a security. This amount is used as the basis for calculation of any increase or decrease in the security's value.

Cyclical management

Management style based on the phases of the economic cycle and their impact on the value of certain types of investment.

Deposit on loans of securities

A transaction involving the sale of a security and the commitment by the vendor to buy back the security at a set price and date.

Depositors' assets

The financial situation and the operating results stemming from deposits made by depositors are presented in the cumulative financial statements and represent depositors' assets. The latter share net assets and net investment income.

Derivative financial instruments

Also known as derivatives, the value of these financial instruments is derived from a commodity or underlying asset they represent. Forward and option contracts are good examples of this type of instrument

Direct investment

Any investment made directly in a company.

Economic return

The impact of investments on the economy as a whole, for example when they enable a company to expand, and thus increase its activities and create new jobs.

Fair value

Exchange value that would be agreed on by competent parties acting freely in competitive conditions.

Fund of funds

A fund that invests in multiple hedge funds with different investment styles in order to smooth out the potential inconsistency of returns if all the assets were invested in a single hedge fund. These funds offer an effective way for an investor to gain exposure to a range of hedge funds and strategies without having to commit substantial assets or resources to specific asset allocation, portfolio construction and individual hedge fund selection.

Indirect investment

Any investment made in an investment fund or in a limited partnership company, which in turn invests in various companies.

Internal rate of return

Discount rate for which the present value of net inflows of funds resulting from an investment project is equal to the present value of the outflows required to realize the investment.

Liquid

A market is said to be liquid when both buyers and sellers can, under normal market conditions, readily find other investors buying or selling the same securities. A security is said to be liquid when it can be found easily on the market, and trades in quantities permitting sizable transactions but without significant impact on its market price.

Market capitalization

Valuation of a business or a group of businesses, based on the value of listed stocks and obtained by multiplying the number of common shares outstanding by their market price.

Mutual fund

A mutual fund pools the money of many people and invests it in stocks, bonds or other securities to pursue a specific financial objective. The fund is managed by professional money managers who select the particular securities that they believe will help the fund achieve the shareholders' "mutual" goal.

Option

A contract giving its holder the right, although not the obligation, to buy (call option), or sell (put option) a commodity or a financial asset, at a set price within a predetermined period of time.

Passive management

Management style that calls for building a portfolio that reproduces the weighting of the chosen benchmark. The goal is to obtain a return similar to that of the market or index.

Private company

Any company whose shares are not listed on a stock exchange and are usually held by a limited number of shareholders. Transfer of ownership of such shares is usually subject to restrictions.

Private investment

An investment made in a private or public company following discussions and negotiations. At the Québec CDP, equity as well as mortgage and real estate investments are included in that definition.

Private placement

Investment in securities offered directly by an issuer to a limited number of investors without going through the stock market.

Public company

Any private-sector company whose shares are listed on a stock exchange. Securities may trade on the floor or over-the-counter.

Real estate

Buildings and land held in a real estate portfolio.

Realized investment

An investment in a company which has been partially or entirely paid by the investor at the time financial reporting is prepared.

Sectorial management

Management style based on the selection of securities within a single industry, with no geographic restrictions. Selection is made according to international trends in the given sector and macroeconomic factors.

Securitization

Operation by which certain assets (mortgages, for example) are sold to a company that finances their acquisition by issuing marketable securities.

Segregated fund

Investment fund sold by insurance companies. As opposed to mutual funds, segregated funds usually include a partial or total guarantee covering the invested capital over a long period, commonly 10 years. The guarantee may range from a minimum of 75% of the purchase price to more than 100% in certain funds.

Standard deviation

A measure of the spread between a given return on a specific date and the average return.

Structural management

Management style based on the balance between different asset classes, such as fixed-income and variable-income securities, within a portfolio.

Time value

Difference between the market value of an option, for example, and its intrinsic value, that is the difference between the market value of the underlying asset and the exercise price of a call option.

Total assets under management

Includes depositors' assets and assets administered and under management on clients' behalf.

Value at risk

The negative effect, the risk of change to market prices and rates can have on the value of a portfolio during a given period.

Venture capital

Capital invested in new companies that often show strong potential for innovation but whose owner-operators, partners or shareholders lack the necessary resources to finance long-term projects. Also applies to investments in private companies by investors who do not take part in the day-to-day management of operations.

Volatility

A market or a security is said to be volatile when it is subject to or undergoes rapid price changes. The beta coefficient is used to calculate the volatility of a security relative to the market as a whole.
